北京医院（国家老年医学中心）
Beijing Hospital (National Center for Gerontology)

北京医院（国家老年医学中心）始建于 1905 年，是直属于国家卫生健康委员会的三级甲等医院，是老年疾病国家临床医学研究中心、中国医学科学院老年医学研究院，为国家中医药管理局首批中西医协同“旗舰”医院建设试点单位、全国综合医院示范中医药工作单位。

医院拥有国家卫生健康委临床重点专科 23 个、北京市临床重点专科、中医药重点专科各 1 个，中医科、内分泌科、老年医学科、血管外科为国家级中西医协同“旗舰”科室，骨科、手术麻醉科 / 针灸按摩科等科室为北京市级中西医协同“旗舰”科室。

医院开设内分泌代谢病、血管外科疾病等中西医结合门诊，开展了骨质疏松、肥胖症的针灸治疗等 13 种特色疗法，在糖尿病及其慢性并发症、代谢综合征、老年衰弱及肌少症、肿瘤、重症感染等病种诊治方面具有中西医协同优势。

医院与美国加州针灸局开展国际交流，多次接待来自瑞士等国家的针灸学习观摩团，派多位专家赴美交流，在洛杉矶中医药文化节、慈济全美年会进行健康宣教。医院推动中医药及针灸学术对外传播，促进东西方医学交融，向国际传递中医药诊疗思维，提升医院国际知名度与中医药海外认可度。

北京医院院区
Campus Landscape of Beijing Hospital

北京医院院区全景
Panoramic View of Beijing Hospital

Beijing Hospital (National Center for Gerontology) was founded in 1905. It is a Grade A Tertiary hospital (the highest level in China's three-tier hospital classification system) directly affiliated with the National Health Commission, and serves as the National Clinical Research Center for Geriatric Diseases and the Institute of Geriatric Medicine of the Chinese Academy of Medical Sciences. It is also one of the first pilot hospitals for the construction of "flagship" hospitals integrating traditional Chinese and Western medicine under the National Administration of Traditional Chinese Medicine, and a demonstration unit for traditional Chinese medicine work among general hospitals nationwide.

Beijing Hospital has 23 clinical key specialties designated by the National Health Commission (including the Department of Traditional Chinese Medicine), as well as one Beijing municipal clinical key specialty and one key specialty of traditional Chinese medicine. The Department of Traditional Chinese Medicine, the Department of Endocrinology, the Department of Geriatrics, and the Department of Vascular Surgery are national-level "flagship" departments for coordinated integration of traditional Chinese and Western medicine, while the Department of Orthopedics, the Department of Surgical Anesthesiology, the Department of Acupuncture and Massage, and other departments are Beijing municipal-level "flagship" departments for the integration of traditional Chinese and Western medicine.

The hospital offers integrated traditional Chinese and Western medicine outpatient services for endocrine and metabolic diseases, vascular surgical diseases, and other conditions. It has developed 13 specialized therapies, including acupuncture treatment for osteoporosis and obesity. The hospital has demonstrated strengths in the coordinated use of traditional Chinese and Western medicine in the diagnosis and treatment of diabetes and its chronic complications, metabolic syndrome, geriatric frailty and sarcopenia, tumors, and severe infections, among other conditions.

The hospital engages in international exchanges with the California Acupuncture Board in the United States, has repeatedly hosted acupuncture study and observation delegations from countries such as Switzerland, and has sent multiple experts to the United States for academic exchanges. It has also conducted health education and outreach at the Los Angeles Traditional Chinese Medicine Culture Festival and the Tzu Chi National Annual Conference in the United States. The hospital promotes the international dissemination of traditional Chinese medicine and acupuncture knowledge, facilitates the integration of Eastern and Western medicine, conveys TCM diagnostic and therapeutic approaches to the international community, and enhances the hospital's global visibility as well as the international recognition of traditional Chinese medicine.

北京大学第一医院
Peking University First Hospital

北京大学第一医院始建于 1915 年，为三级甲等综合医院，开放床位数 2457 张，门、急诊量超 475 万人次，年度机器人手术超过千台，近五年获批各类课题经费约 22 亿元，28 个科室获批国家临床重点专科。

医院是中西医协同“旗舰”医院试点单位。中医、中西医结合科是国家临床重点专科、高水平中医药重点学科，北京市综合医院示范中医科、中西医协同“旗舰”科室，建立了北京大学中西医结合研究所、北京市中西医结合临床研究所。

医院已组建 16 支中西医协同创新团队，实行中医、西医双负责人制。团队依托西医优势学科，以临床瓶颈问题和中医优势病种为切入点，推动中西医科室在门诊、病房、护理等环节开展多层次协作；医院引进数智化中医体质辨识设备，针对糖脂代谢紊乱开展基于中医体质学的中医药前置干预。在此基础上，已制定并实施 22 个中西医协同诊疗方案与临床路径，形成覆盖多学科、全生命周期的中西医联合诊疗网络。在人才队伍建设方面，通过北京市“西学中”培训班等多种渠道，培养中西医复合型人才 44 人；同时遴选 21 名护理骨干组建中西医结合护理专业组，培养并认证院级专科护士 65 人，并将中医适宜技术推广至西医临床科室，进一步拓展中西医协同服务范围。

北京市科学技术进步奖
Beijing Municipal Science and Technology Progress Award

北大医院中西医结合科支撑平台
Support Platform of the Department of Integrated Traditional Chinese and Western Medicine, Peking University First Hospital

Peking University First Hospital was founded in 1915. It is a Grade A tertiary general hospital with 2,457 registered beds. The hospital receives more than 4.75 million outpatient and emergency visits annually and performs more than 1,000 robotic surgeries each year. Over the past five years, it has secured approximately RMB 2.2 billion in funding for various research projects, and 28 departments have been approved as National Clinical Key Specialties.

The hospital is a pilot institution for the development of "flagship" hospitals integrating traditional Chinese and Western medicine. Its Department of Traditional Chinese Medicine and Integrated Traditional Chinese and Western Medicine has been designated as a National Clinical Key Specialty and a High-Level Key Discipline of Traditional Chinese Medicine, as well as a Beijing Demonstration Department of Traditional Chinese Medicine in General Hospitals and a Beijing "Flagship" Department for the integration of traditional Chinese and Western medicine. The hospital has established the Peking University Institute of Integrated Traditional Chinese and Western Medicine and the Beijing Clinical Research Institute of Integrated Traditional Chinese and Western Medicine.

The hospital has established 16 collaborative innovation teams integrating traditional Chinese and Western medicine, each operating under a dual-leadership system with one leader from traditional Chinese medicine and one from Western medicine. Leveraging the strengths of Western medical specialties, the teams address clinical bottlenecks and diseases in which traditional Chinese medicine has particular advantages as key entry points. They promote multi-level collaboration between TCM and Western medicine departments across outpatient services, inpatient wards, nursing care, and other areas. The hospital has also introduced intelligent TCM constitution assessment equipment to provide constitution-based early intervention using traditional Chinese medicine for disorders of glucose and lipid metabolism. On this basis, 22 integrated diagnosis and treatment protocols and clinical pathways have been developed and implemented, forming an integrated TCM-Western medicine care network covering multiple disciplines and the entire life cycle. In terms of workforce development, the hospital has trained 44 professionals with combined expertise in traditional Chinese and Western medicine through various channels, including the Beijing "Learning TCM for Western Medicine Practitioners" training program. In addition, 21 nursing professionals have been selected to form a specialized TCM-integrated nursing team, and 65 nurses have been trained and certified as hospital-level specialized nurses. Appropriate TCM techniques have also been introduced into Western medicine clinical departments, further expanding the scope of integrated traditional Chinese and Western medicine services throughout the hospital.

03 中日友好医院
China-Japan Friendship Hospital

中日友好医院（简称“中日医院”）于 1984 年 10 月 23 日建立，是国家卫生健康委员会直属的大型综合性三级甲等医院。医院是国家呼吸医学中心、国家中西医结合医学中心，编制床位 1610 张，年服务门诊患者超 300 万人次。

医院以呼吸医学、中西医结合医学等为核心特色，拥有 32 个国家临床重点专科，拥有中医肺病科、中医风湿病科、中西医结合肿瘤内科、中西医结合临床重点专科等 10 余个国家中医药管理局相关平台，研制消癭丸、生发酊、如意金黄膏、平肺口服液等 22 种中药特色院内制剂；与 20 余个国家的顶尖机构建立长期合作关系，开展联合诊疗、科研攻关等，承担国际医疗援助等任务。

传统医学与现代医学融合研究的新范式
A new paradigm for the integration of traditional medicine and modern medicine research

China-Japan Friendship Hospital (CJFH), founded on October 23, 1984, is a large Grade A tertiary general hospital directly affiliated with the National Health Commission of China (NHC). The hospital has 1,610 beds and serves more than 3 million outpatient visits annually. It is home to the National Center for Respiratory Medicine and the National Center for Integrative Medicine.

With respiratory medicine and integrative medicine as its core specialties, CJFH has 32 National Clinical Key Specialties. It also has more than 10 platforms and programs associated with the National Administration of Traditional Chinese Medicine, including TCM Pulmonology, TCM Rheumatology, Integrative Oncology, and national key clinical specialties in integrated traditional Chinese and Western medicine. The hospital has developed 22 specialized hospital-made traditional Chinese medicine preparations, including Xiaoying Pill, Shengfa Tincture, Ruyi Jinhuang Ointment, and Pingfei Oral Solution. CJFH has established long-term partnerships with leading institutions in more than 20 countries, carrying out joint clinical diagnosis and treatment, collaborative research, and other forms of international cooperation. The hospital also undertakes international medical assistance and other related missions.

中国中医科学院西苑医院
Xiyuan Hospital of China Academy of Chinese Medical Sciences

中国中医科学院西苑医院成立于 1955 年，是新中国成立后由中央政府建设的第一所集医疗、科研、教学、保健为一体的大型综合性三级甲等中医医院。医院拥有临床科室 35 个、医技科室 8 个，编制床位 800 张，年门急诊量 270 万人次。近年来，医院获批国家中医心血管病临床医学研究中心、国家工程研究中心、国家区域医疗中心、中医类国家医学中心“辅导类”创建单位、国家中医药传承创新中心、国家中医临床教学培训示范中心和国际科技合作基地，是目前全国唯一整体推进国家级“六中心一基地”建设的中医医院。

医院现有国家级临床重点专科 5 个，国家中医药管理局重点专科 14 个、国家中医优势专科 14 个，北京市十二五重点专科 5 个，十四五领超类重点专科 6 个、并超类 6 个，在多种重大疑难疾病的中医和中西医结合治疗方面疗效显著。源于名医经验的院内制剂近百种，如复方酸枣仁膏、生发酊等明星产品，广受患者好评。医院拥有国家国际科技合作基地等科技平台，承担国家级课题 300 余项，获得奖励 310 余项，自主研发及转让各种新药 60 余种。医院是国家国际科技合作基地、国家服务贸易出口基地、首批北京市中医药服务交往机构，是中医药国际传播的重要窗口。作为援外培训承办单位，连续 16 年开展中医药国际培训 90 余期，项目惠及五大洲 3000 余名外籍人士。疫情期间，组建首支整建制中医援外医疗队，在柬埔寨启动首个海外政府间中医门诊建设，突破了海外行医资质瓶颈，树立了中医药全方位服务的典范。

西苑医院俯瞰图
Overlook of Xiyuan Hospital

Founded in 1955, Xiyuan Hospital of China Academy of Chinese Medical Sciences (CACMS) was the first large-scale, Grade A tertiary general hospital specializing in traditional Chinese medicine established by the central government after the founding of the People's Republic of China. The hospital integrates medical care, scientific research, education, and health care. It has 35 clinical departments and 8 medical technology departments, with 800 authorized beds and an annual volume of 2.7 million outpatient and emergency visits. In recent years, Xiyuan Hospital has been approved as the National Clinical Research Center for Cardiovascular Diseases in Traditional Chinese Medicine, a National Engineering Research Center, a National Regional Medical Center, a pilot institution for the development of a National Medical Center for Traditional Chinese Medicine, a National TCM Inheritance and Innovation Center, a National Demonstration Center for TCM Clinical Teaching and Training, and an International Science and Technology Cooperation Base. It is currently the only TCM hospital in China undertaking the integrated development of the national-level "Six Centers and One Base" initiative.

The hospital currently has 5 national clinical key specialties, 14 key specialties designated by the National Administration of Traditional Chinese Medicine, 14 national TCM specialty areas with distinctive advantages, 5 key specialties under Beijing's 12th Five-Year Plan, 6 "Lingchao" key specialties and 6 "Bingchao" key specialties under the 14th Five-Year Plan. It has achieved notable results in the TCM and integrated TCM-Western medicine treatment of various major and complex diseases. The hospital has developed nearly 100 in-house TCM preparations based on the experience of renowned physicians, including Fufang Suanzaoren Gao (Compound Suanzaoren Paste) and Shengfa Ding (Hair Growth Tincture), which have received positive feedback from patients. As a major scientific and technological platform, the hospital has undertaken more than 300 national-level research projects, received more than 310 awards, and independently developed and transferred more than 60 new drugs. Xiyuan Hospital is a National International Science and Technology Cooperation Base, a National Service Trade Export Base, and one of the first Beijing institutions designated for international exchanges and cooperation in traditional Chinese medicine. It serves as an important international platform for the dissemination of traditional Chinese medicine. As an institution responsible for organizing international TCM training under China's foreign-aid programs, the hospital has conducted more than 90 international TCM training programs over 16 consecutive years, benefiting more than 3,000 foreign participants from five continents. During the COVID-19 pandemic, the hospital formed the first fully organized TCM foreign-aid medical team and launched the first overseas intergovernmental TCM clinic in Cambodia. This initiative helped overcome barriers related to overseas medical practice qualifications and established a model for comprehensive international TCM services.

中国中医科学院广安门医院
Guang'anmen Hospital of China Academy of Chinese Medical Sciences

中国中医科学院广安门医院于 1955 年建立，是一所底蕴深厚、名医荟萃、特色鲜明、享有盛誉的国家级大型三级甲等中医医院。通过国家医疗健康信息互联互通成熟度五级乙等测评、电子病历六级等级评审，全国首家发布中医医疗大模型。医院共有 2 个院区（本部、南区）、总建筑面积 15.1 万平方米，本部拥有临床科室 37 个、医技科室 9 个，年门诊量 520 万人次。两个院区编制床位 1470 张。

医院全景图
Panoramic View of Guang'anmen Hospital

医院具有国家临床重点专科 6 个，国家中医药管理局重点专科 16 个、重点学科 12 个、三级实验室 5 个，国家区域中医（专科）诊疗中心 6 个，国家中医优势专科 12 个，将中医传统疗法与现代诊疗技术有机结合，在治疗常见病、慢性病及疑难病症方面疗效独特。医院以名老中医经验为基础，研制出中医药特色突出的院内制剂 120 种，如西黄解毒胶囊等治疗肿瘤、瘿瘤消胶囊等治疗甲状腺疾病、消喘膏治疗咳嗽哮喘等。自 1965 年以来，医院先后接待 168 位副部级以上国外政要及贵宾来访，多次承办重要国际会议，培训包括世卫组织基层医生在内的学员 2000 余名，接待来自 70 多个国家、地区的交流人员 3 万余人。

Guang'anmen Hospital (GAMH), China Academy of Chinese Medical Sciences, founded in 1955, is a large-scale, nationally recognized Grade A tertiary hospital specializing in traditional Chinese medicine (TCM), with a rich heritage, renowned TCM physicians, distinctive medical expertise, and a strong reputation. The hospital has passed the Level 5 Grade B assessment for national healthcare information interoperability maturity and the Level 6 assessment for electronic medical records. It is also the first TCM hospital in China to release a large TCM medical model. GAMH has two campuses, namely the main campus and the south campus, with a total construction area of 151,000 square meters. The main campus has 37 clinical departments and 9 medical technology departments and receives approximately 5.2 million outpatient visits annually. The two campuses have a total of 1,470 authorized beds.

The hospital has 6 National Clinical Key Specialties, 16 key specialties, 12 key disciplines, and 5 Level-3 laboratories designated by the National Administration of Traditional Chinese Medicine, as well as 6 National Regional TCM Specialty Diagnosis and Treatment Centers and 12 National TCM Advantage Specialties. It integrates traditional TCM therapies with modern diagnostic and treatment technologies, with distinctive therapeutic effects in the treatment of common, chronic, and difficult-to-treat diseases. Based on the clinical experience of renowned senior TCM physicians, the hospital has developed 120 in-house traditional Chinese medicine preparations with distinctive TCM characteristics, including Xihuang Jiedu Capsules for the treatment of tumors, Yinliuxiao Capsules for thyroid diseases, and Xiaochuan Plaster for cough and asthma. Since 1965, the hospital has received 168 foreign dignitaries and distinguished guests at the vice-ministerial level or above, hosted numerous important international conferences, trained more than 2,000 trainees, including primary healthcare physicians affiliated with WHO programs, and hosted more than 30,000 visitors from more than 70 countries and regions for international exchanges.

Unveiling ceremony of the Nanyang Hospital of Wang Jing Hospital of CACMS

Wangjing Hospital of China Academy of Chinese Medical Sciences (Institute of Orthopedics and Traumatology of China Academy of Chinese Medical Sciences), founded in 1997, is a Grade A tertiary hospital specializing in traditional Chinese medicine (TCM) directly affiliated with the National Administration of Traditional Chinese Medicine (NATCM). With a focus on developing a clinical research base for TCM orthopedics and traumatology and a TCM rehabilitation center, the hospital has strong emergency treatment and emergency response capabilities and combines traditional and modern diagnostic and therapeutic techniques. It has 1,100 authorized beds, receives approximately 1.38 million outpatient and emergency visits annually, and has 46 clinical and medical technology departments.

The hospital has four National Clinical Key Specialties, namely TCM Orthopedics and Traumatology, Nephrology, Spleen and Stomach Diseases, and Rehabilitation, as well as 10 key specialties designated by the National Administration of Traditional Chinese Medicine, including Orthopedics and Traumatology and Rheumatology. The hospital has one academician of the Chinese Academy of Engineering and numerous national-level TCM professionals. It is a designated output institution for the National Regional Medical Center for TCM (Orthopedics and Traumatology), the National TCM Orthopedics and Traumatology Specialty Medical Center, and the National TCM Sports Medicine Center, and is a designated institution for the development of a TCM Rehabilitation Center. It also houses the Beijing Institute of Integrated Traditional Chinese and Western Medicine Orthopedics and Traumatology. Through decades of development and the transmission of TCM expertise, the hospital has developed a number of distinctive TCM therapies for the treatment of orthopedic and traumatologic conditions, including small splint therapy, Qinggong bone-setting manipulation, and rotation-and-lifting manipulation for the treatment of cervical spondylosis with radiculopathy. These therapies have gained considerable recognition in academic circles both in China and abroad. The hospital currently has four in-house TCM preparations, including Xuanbi Wash. The hospital has conducted academic exchanges, training, and cooperation with more than 40 countries and regions, including the United States, Japan, Switzerland, South Korea, Russia, and the United Kingdom.

中国中医科学院眼科医院
Eye Hospital of China Academy of Chinese Medical Sciences

The Eye Hospital of China Academy of Chinese Medical Sciences (CACMS) was founded in 1994 and is affiliated with the China Academy of Chinese Medical Sciences. As one of the hospitals directly affiliated with the National Administration of Traditional Chinese Medicine (NATCM), it is a Grade A tertiary specialized hospital specializing in traditional Chinese medicine (TCM) that integrates medical care, scientific research, and education. The hospital has 800 authorized beds and receives approximately 488,000 outpatient visits annually.

The hospital has four National TCM Specialties with Distinctive Advantages and three Beijing municipal key specialties. It is home to numerous renowned experts and scholars from China and abroad, including National TCM Masters, Capital Distinguished TCM Physicians, and Qihuang Scholars. The hospital pioneered a diagnostic and therapeutic model integrating local and systemic TCM syndrome differentiation and has developed distinctive TCM diagnostic and therapeutic protocols for conditions such as retinal vein occlusion, age-related macular degeneration, retinitis pigmentosa, optic atrophy, glaucoma, and pediatric eye diseases. It has successfully translated clinical prescriptions developed by renowned senior TCM experts into 13 in-house TCM preparations, including Peiyuan Mingmu Pills, Qiming Pills, Mushu Pills, Jueming Tuiyi Pills, and Qijin Tuiyi Granules. The hospital actively promotes international exchanges and cooperation and has established collaborative relationships with medical, research, and educational institutions and organizations in more than 20 countries, including Norway and the United States. It has established the China-Norway TCM Center focusing on clinical diagnosis and treatment, scientific research, international talent development, and the dissemination of TCM culture, and has conducted multiple international training programs in TCM and integrated traditional Chinese and Western medicine.

北京中医药大学东直门医院
Dongzhimen Hospital of Beijing University of Chinese Medicine

北京中医药大学东直门医院创办于 1958 年，作为北京中医药大学第一临床医学院，是首批国家大型综合性三级甲等中医医院和国家示范中医医院、国家中医临床研究基地和国家药物临床试验机构、国家医学中心和国家中医药传承创新中心、国家级中医学实验教学示范中心。设置临床专业 86 个，编制床位 1574 张；年门急诊量超过 300 万人次。

拥有教育部重点学科 1 个，国家中医药管理局重点学科 9 个，北京市重点学科 2 个。国家临床重点专科 6 个，区域中医（专科）诊疗中心 5 个，国家中医药管理局重点专科 16 个，北京市重点专科 13 个。

现有院内中药制剂 127 种，均由专家名医验方转化而来，如复方苦参止痒软膏、乌地生发丸、解毒清肺合剂、复方玄参清解合剂、芪甲扶正胶囊、三黄散结胶囊复痿颗粒等均疗效显著，广受患者青睐。

医院是世界卫生组织中医适宜技术项目培训基地。1991 年医院在德国建立魁茨汀医院，是欧洲最早纳入医疗保险的中医医院，迄今仍是唯一享有国外医保的中医医疗机构。医院每年向北京中医药大学美国中医中心和澳大利亚中医中心派遣专家和学者，搭建中医和西医在医疗、教学、科研等方面的合作平台，惠及当地人民健康，使之成为中医药国际交流和展示窗口。

Founded in 1958, Dongzhimen Hospital of Beijing University of Chinese Medicine, the first Clinical Medical School of Beijing University of Chinese Medicine, is one of the first national large-scale comprehensive tertiary Class A Chinese medicine hospitals and national demonstration Chinese medicine hospitals, national clinical research bases of Chinese medicine and national drug clinical trial facilities, national medical centers, national TCM inheritance and innovation centers, and national demonstration centers for experimental teaching of Chinese medicine. The hospital has 86 clinical specialties, 1574 beds and an annual outpatient and emergency treatment capacity of 3 million visits.

It has 1 key discipline of the Ministry of Education, 9 key disciplines of the National Administration of Traditional Chinese Medicine, and 2 key disciplines of Beijing. It has 6 national key clinical specialties, 5 regional TCM (specialty) diagnosis and treatment centers, 16 key specialties of the National Administration of Traditional Chinese Medicine, and 13 key specialties of Beijing.

It has 127 hospital Chinese medicinal preparations, all transformed from expert and renowned doctors' prescriptions, such as Compound Kushen Antipruritic Ointment, Wudi Shengfa Pills, Detoxification-Clearing Lung Mixture, Compound Xuanshen Qingjie Mixture, Qijia Fuzheng Capsules, Sanhuang Sanjie Capsules and Fuwei Granules. All of them are of remarkable efficacy and are widely favored by the patients.

The hospital is a training base for the appropriate technology of Chinese medicine designated by the World Health Organization. In 1991, the hospital established KoetZting Hospital in Germany, which was the first Chinese medicine hospital in Europe to be included in the medical insurance system, and is still the only Chinese medicine medical institution enjoying foreign medical insurance. The hospital dispatches experts and scholars to the US Center for Chinese Medicine and Australian Center for Chinese Medicine by BUCM every year to establish a cooperation platform between Chinese medicine and Western medicine in medical treatment, teaching, scientific research, and other areas, benefiting the health of local people and making it a window for international exchange and exhibition of Chinese medicine.

Tsinghua University Yuquan Hospital (Tsinghua University Hospital of Integrated Traditional Chinese and Western Medicine), founded in 1983, is a Grade A tertiary hospital specializing in integrated traditional Chinese and Western medicine, providing medical care, teaching, scientific research, and preventive healthcare. The hospital has 500 authorized beds, 33 clinical departments, and 15 medical technology departments, and receives more than 300,000 outpatient visits annually.

As a hospital directly affiliated with Tsinghua University, it serves as a clinical teaching hospital of Tsinghua University and a teaching hospital of Beijing University of Chinese Medicine. The hospital has one High-Level Key Discipline Construction Project in Traditional Chinese Medicine under the National Administration of Traditional Chinese Medicine, two TCM Advantageous Specialty Construction Projects, and two "Flagship" Departments for collaboration between traditional Chinese and Western medicine. It also has three key specialties designated by the Beijing Municipal Administration of Traditional Chinese Medicine and three Beijing municipal "Flagship" Departments for collaboration between traditional Chinese and Western medicine. The hospital continuously develops and enhances its distinctive specialties, disease-specific programs, and new technologies, with neurology and psychiatry, endocrinology and metabolism, and obstetrics and gynecology as representative areas. It has established a medical service model centered on integrated traditional Chinese and Western medicine, featuring a "multi-expert co-management" diagnostic and therapeutic model and full-chain health management. The hospital actively promotes international academic exchanges and medical cooperation through initiatives such as the Visiting Delegation of the Tsinghua University International Advisory Council, the Singapore TCM Training Delegation, and the Visiting Delegation of Thai Physicians. These activities have involved partners and participants from Europe, the Americas, Southeast Asia, and other regions, and the hospital has received approximately 100 visiting experts from China and abroad, further expanding international opportunities for the development of integrated traditional Chinese and Western medicine.

Beijing Massage Hospital (BMH), founded in 1958 and affiliated with the China Disabled Persons' Federation, is a Grade A tertiary hospital specializing in traditional Chinese medicine (TCM), with massage as its core specialty, and serves as the National Technical Resource Center for Medical Massage for the Blind. BMH has two campuses, with 17 clinical departments and 4 medical technology departments, and receives nearly 420,000 outpatient visits annually.

The Department of Tui Na has been successively approved as a key specialty construction project by the National Administration of Traditional Chinese Medicine, a designated cultivation institution for National TCM Advantageous Specialties, a key TCM specialty in Beijing, and a key TCM specialty in Chaoyang District, Beijing.

The hospital continuously refines its academic characteristics and has developed the theoretical system of "TCM Tui Na Pressing-and-Moving Therapy". In 2021, this therapy was included in the fifth batch of representative projects of Beijing municipal intangible cultural heritage under the category of "Traditional Medicine". The hospital has established 24 hospital-level specialized disease clinics, including clinics for vertigo, pelvic imbalance, and knee pain.

The hospital has been approved to establish the Beijing International Tui Na Exchange Center, has been recognized as one of the first batch of Beijing International Exchange Service Institutions for Traditional Chinese Medicine, and has hosted the 9th TCM Health Day Event for Diplomatic Envoys in China. Over the past decade, the hospital has received and trained more than 3,000 international participants from over 50 countries and regions. The hospital has dispatched TCM Tui Na experts to Switzerland, Ireland, Croatia, and Mauritius to conduct cooperation programs, providing local TCM Tui Na training and TCM diagnosis and treatment services.

北京中医医院雪景
Snowy view of Beijing Hospital of Traditional Chinese Medicine

Founded in 1956, Beijing Hospital of Traditional Chinese Medicine, affiliated with Capital Medical University, is the only municipal comprehensive and modern Grade A tertiary hospital specializing in traditional Chinese medicine (TCM) in Beijing. It undertakes responsibilities in TCM medical services, education, scientific research, and disease prevention for Beijing. The hospital has 1,400 authorized beds, 31 clinical departments, and receives more than 2.3 million outpatient and emergency visits annually.

The hospital has one high-level key discipline of traditional Chinese medicine designated by the National Administration of Traditional Chinese Medicine, 8 key disciplines designated by the National Administration of Traditional Chinese Medicine, and 13 National TCM Advantageous Specialties; 5 key disciplines and 16 key specialties designated by the Beijing Administration of Traditional Chinese Medicine; and 6 key medical specialties under the "Yangfan" Program of the Beijing Hospital Management Center. The hospital has developed 184 in-house TCM preparations based on clinical prescriptions, proprietary formulas, and research achievements of renowned senior TCM physicians and experts. These preparations cover nearly 20 dosage forms, including pills, powders, plasters, granules, capsules, lotions, tinctures, and oils. The hospital pharmacy maintains the traditional decoction practice of preparing individualized prescriptions in small pots.

The hospital actively implements the national Belt and Road Initiative and the national strategy for the development of traditional Chinese medicine. During the 14th Five-Year Plan period, it undertook 12 foreign-aid training programs commissioned by the Ministry of Commerce, providing TCM technical training and promoting TCM culture to more than 460 trainees from 43 countries, including Mexico and Egypt. These efforts have continuously enhanced the global influence and dissemination of traditional Chinese medicine.

北京市丰盛中医骨伤专科医院
Beijing Fengsheng Special Hospital of Traditional Medical Traumatology and Orthopaedics

北京市丰盛中医骨伤专科医院创建于1960年，是一所以中医骨伤治疗为特色的二级甲等专科医院。医院历经百年沧桑，六十余载传承，以独特的正骨和筋伤诊疗技术获得京城患者的认可，“丰盛正骨”名列北京市非物质文化遗产代表性项目。目前编制床位数100张，2023年门急诊44万余人次。

医院骨伤科2017年获批首都区域专科及国家中医重点专科，2022年获批北京市基层中医药学科团队示范建设单位、北京市中医药管理局“十四五”中医药重点专科。2024年获评国家中医优势专科。

丰盛正骨起源于西城区有百年历史的“宏庙正骨”，以“稳、准、巧”为正骨技术特色，以量体裁剪、轻便舒适的硬纸夹板外为固定器具，以“接骨丹”、“跌打正骨膏”为接骨续筋代表药物，以“筋骨并重，尤重治筋”为骨折后期肢体关节康复的主要原则，形成了在骨折整复、固定、用药、功能锻炼一体化的丰盛正骨治疗模式，在北京地区的闭合性骨折复位外固定治疗上独树一帜。

医院外景
Exterior view of the hospital

Beijing Fengsheng Special Hospital of Traditional Traumatology and Orthopedics, established in 1960, is a specialized hospital with a feature of traditional Chinese medicine orthopedic treatment. The hospital is renowned for its expertise in orthopedic correction, which has undergone over a century of vicissitudes and has been passed down for more than 60 years. "Feng Sheng Traditional Chinese Orthopedics and Traumatology " is listed as a representative project of Beijing's intangible cultural heritage. It has 100 beds, with an annual outpatient and emergency treatment capacity of 440,000 visits in 2023.

The Orthopedics of the hospital was approved as a capital regional specialty and a national key specialty in traditional Chinese medicine in 2017 and was approved as a demonstration construction unit of the Beijing municipal-level traditional Chinese medicine discipline team and a key specialty of Beijing municipal traditional Chinese medicine administration in 2022. It was awarded the title of National Advantage Specialty in Traditional Chinese Medicine in 2024.

Fengsheng Orthopedics has been operating for a century. - In terms of academics, it adheres to the eight techniques of bone setting and uses hard paper splints as fracture fixation materials, which can be made according to the actual condition of the patient's condition. Fengsheng Orthopedics has "Jiegu dan " and "Dieda Zhenggu Ruangao" to promote swelling reduction pain relief and bone healing. It pays equal attention to tendons, muscle, and bone, especially in the late stage of fracture and joint recovery, and has formed a comprehensive Fengsheng Orthopedics treatment model for fracture reduction, fixation, and drug use, as well as functional exercise. It has established a unique reputation in Beijing for closed fracture reduction and external fixation treatment.

国际交流对话
International exchange

Beijing Rectum Hospital, also known as Beijing Er Long Lu Hospital, founded in 1937, is a tertiary Class A integrated Chinese and Western medicine hospital featuring diagnosis and treatment of various complex, difficult and serious anorectal diseases. It is the consultation center for difficult colorectal diseases in the Beijing-Tianjin-Hebei region and the Beijing Traditional Chinese Medicine (Integrated Traditional Chinese and Western Medicine) Colorectal Medicine Center. It has 485 beds and an annual outpatient and emergency treatment capacity of about 400,000 visits.

Its anorectal and emergency anorectal departments have been selected as the national dominant Chinese medicine construction projects, and its anorectal and spleen and stomach disease departments have been selected as Beijing municipal key specialties of Chinese medicine. The hospital has strengthened the coordination of Chinese and Western medicine in the areas of emergency and acute care in anal and intestinal specialties and post-operative wound rehabilitation, establishing a model of full-cycle disease management. The hospital has more than 20 specialty preparations, and its anti-inflammatory suppositories, compound tetracaine pastes and other preparations are widely praised by patients at home and abroad.

The hospital has been continuously conducting training and exchange with medical institutions in the United States, the United Kingdom, Germany, Italy, Austria, Japan, and other countries for many years. It receives more than 100 foreign patient visits annually.

Beijing First Hospital of Integrated Traditional Chinese and Western Medicine (Beijing Integrated Traditional Chinese and Western Medicine Cardiac Rehabilitation Center), established in 1936, is a public medical institution integrating medical treatment, scientific research, teaching, preventive health care and first aid, a practice teaching base of Changchun University of Chinese Medicine, and a guidance center for elderly health and medical-care integration services in Chaoyang District. The hospital consists of 3 areas, covering a total construction area of 280,000 m^2, with 405 beds, 27 clinical departments, 8 medical laboratories, and an annual outpatient treatment capacity of 650,000 visits.

The hospital has 2 national "flagship" department construction projects of combined Chinese and Western medicine, 3 key specialties of Beijing Administration of Traditional Chinese Medicine, 1 Beijing municipal "flagship" project of Chinese and Western medicine collaboration, and 5 key specialties of Chinese medicine at district level. Relying on the valuable experience of senior renowned Chinese medicine practitioners, it has innovated Chinese medicine non-pharmacological therapies, such as electro-thermal needles for the precise treatment of cardiovascular and cerebrovascular disorders, and acupotomy therapies with advanced visualization technology for the effective relief of joint pains and ailments. It has maintained a cooperative exchange relationship with the Mayo Medical Center in the United States. It has received many visits from Mayo medical experts and organized seminars for Chinese and foreign experts to exchange information on the latest research progress of cardiac rehabilitation with Chinese and Western medicine.

朝阳区中医医院本部
Headquarters of Chaoyang District Hospital of Traditional Chinese Medicine

Beijing Chaoyang District Hospital of Traditional Chinese Medicine was formerly known as Chaoyang Guanxiang Hospital, which was established in 1951. After renovation and expansion in 1994, it was renamed Chaoyang District Hospital of Traditional Chinese Medicine. It is the only comprehensive Grade A secondary hospital of traditional Chinese medicine in Chaoyang District. Meanwhile, as Chaowai Community Health Service Center, it undertakes public health services for the Chaowai and Jianwai subdistricts. The hospital currently has 13 outpatient departments, 5 inpatient wards, and 220 authorized beds.

The hospital has 3 key TCM specialties designated by Beijing Municipality and 2 key TCM specialties designated by Chaoyang District. It also has 1 National Studio for the Inheritance of Experience from Renowned Senior TCM Physicians and 2 research studios for the inheritance of experience from renowned senior TCM physicians and grassroots senior TCM physicians under the Beijing TCM "3+3" Inheritance Program.

The hospital has always adhered to the principle of featuring TCM therapies such as Chinese herbal medicine, acupuncture, and Tui Na, complemented by modern diagnostic and treatment approaches. It has accumulated extensive experience and achieved definite therapeutic effects in the integrated treatment of cardiovascular and cerebrovascular diseases, malignant tumors, geriatric diseases, and orthopedic conditions.

As the district-level TCM medical center of Chaoyang District, the hospital actively undertakes TCM medical care, teaching, and scientific research tasks in Chaoyang District, fully leverages its role in providing guidance and support, and promotes the improvement of the quality and efficiency of regional TCM services in an all-round manner. Meanwhile, as the Chaoyang District Bilingual TCM Health Service Center, the hospital organizes several international exchange activities each year and receives more than 100 overseas visitors for exchanges.

皮肤原位再生技术案例
Skin in situ regeneration technology case

Beijing Fengtai District Hospital of Traditional Chinese Medicine, established in May 1957, has a long history and distinctive features. The hospital is located on the southern axis of Beijing, 10 kilometers away from Tiananmen Square. It is the only district-owned public Beijing Fengtai Hospital of Traditional Chinese Medicine, established in May 1957, is located in the south axis of Beijing, 10 kilometers away from Tiananmen Square, with a long history and distinctive features. It is the only district public hospital of Chinese medicine and a Beijing elderly friendly hospital. It has 300 beds and an annual outpatient treatment capacity of nearly 500,000 visits.

It has 2 key specialties of the 14th Five-Year Plan of Beijing Administration of Traditional Chinese Medicine, 3 studios (sub-stations) of masters of Chinese medicine, 2 renowned doctors of Chinese medicine, and 1 young and middle-aged Chinese medicine practitioner of the capital. Its key Chinese medicine specialties are gynecology and dermatology. The skin in-situ regeneration technology adopted by the dermatology department uses moist burn cream to treat wounds, which can clear away heat and toxic materials, remove decay and regenerate muscles, while reducing swelling and relieving pain. In recent years, the hospital has been actively responding to the national "Belt and Road" initiative by focusing on the core requirement of high-quality development in the new era, and has carried out exchanges and cooperation with medical, scientific research, and educational institutions in Brazil, Peru, Canada, Russia, and many other countries. It has become the China-Brazil Center for International Cooperation and Co-construction of Traditional Medicine and the China-Peru Base for Cooperation and Co-construction of Wisdom Traditional Medicine and has trained more than 1,000 international trainees and received more than 2,000 exchanges from more than 20 countries/regions.

医院外景
Exterior view of the hospital

2002 年，任大夫到俄罗斯会诊时遇到俄罗斯少年谢尔盖。当时 16 岁的谢尔盖在一次跳水时头与池边碰撞
入水池，诊断为颈 4、5、6 骨折伴脊髓损伤。两天后给予支架钢板内固定，术后并发肺部感染，双上肢
感觉减退，双下肢肌力消失，大小便失禁。经任大夫会诊后一个月来到北京红星医院继续康复治疗。
2002 年 8 月 17 日入院诊断记录如下：1、高位截瘫 2、颈部骨折内固定术后 3、褥疮 4、尿路感染、管床
回忆：来时谢尔盖连坐起的能力都没有，开始被动的坐位练习时常出现眩晕。入院后在任大夫指导下，
都有可喜进展。前 4 周褥疮和尿路感染得到控制并逐渐拔除尿管使恢复排尿功能成为可能。第 6 周开始
趾会翘了，第 8 周脚腕能动了，手指开始主动运动。入院后三个月开始下地活动。来北京时谢尔盖的父
他立了三个理想：1、学会说汉语，2、走着回俄罗斯，3、学会中国工夫。当时病友当笑话讲：俄罗斯老
任教授当神仙了，经过一年的精心治疗，这个俄罗斯小伙子不仅能扶单拐行走，并能驾驶自动档汽车，
会了打太极拳。

北京市回民医院
Beijing Huimin Hospital

北京市回民医院是一所具有民族特色的三级甲等中西医结合医院，始建于 1947 年，其前身是中国回教协会北京分会创办的“普慈施门诊部”，1949 年更名为“北京市回民医院”，为宁夏医科大学和华北理工大学教学医院，中央民族大学教学基地，全国中医学术流派传承工作室建设单位，世界中医药学会联合会回医药学专业委员会副会长单位。医院编制床位数 400 张，年门急诊量约 34 万人次。

医院拥有市级重点专科 3 个（民族医学科、脑病科、康复科），区级重点专科 1 个（呼吸与危重症医学科）。医院为北京市回医药研究所和北京市民族医药文化展示基地，面向广大市民及留学生开展民族医药文化科普，组织中医养生知识学习体验活动，充分展现中医药文化魅力。目前已有来自法国、土耳其、莫桑比克等 26 个国家的近 40 名外籍留学生参与相关活动。

北京市回民医院
Beijing Huimin Hospital

Beijing Huimin Hospital is a Grade A tertiary hospital of integrated traditional Chinese and Western medicine with distinctive ethnic characteristics. Established in 1947, it originated from the "Pu Ci Shi Clinic" founded by the Beijing Branch of the Chinese Islamic Association and was renamed Beijing Huimin Hospital in 1949. It serves as a teaching hospital of Ningxia Medical University and North China University of Science and Technology, a teaching base of Minzu University of China, a designated institution for the establishment of a National Inheritance Studio for Academic Schools of Chinese Medicine, and a vice-chair institution of the Specialty Committee of Hui Medicine of the World Federation of Chinese Medicine Societies. The hospital has 400 authorized beds and receives approximately 340,000 outpatient and emergency visits annually.

The hospital has three municipal-level key specialties (Ethnic Medicine, Neurology, and Rehabilitation) and one district-level key specialty (Respiratory and Critical Care Medicine). It serves as the Beijing Hui Medicine Research Institute and the Beijing Ethnic Medicine Cultural Exhibition Base, providing public education on ethnic medicine and culture for residents and international students. The hospital organizes learning and experience activities on TCM health preservation knowledge, fully demonstrating the appeal of TCM culture. Nearly 40 international students from 26 countries, including France, Türkiye, and Mozambique, have participated in these activities.

Training on Abdominal Lifting and Compression Cardiopulmonary Resuscitation Technique

北京市健宫医院
Beijing Jiangong Hospital

Beijing Jiangong Hospital, founded in 1953, is a modern Grade A tertiary hospital of integrated traditional Chinese and Western medicine, integrating medical care, teaching, scientific research, prevention, and healthcare services. It serves as a teaching hospital of Beijing University of Chinese Medicine. The hospital has 457 authorized beds and 33 clinical and medical technology departments, with an annual outpatient and emergency volume of more than 600,000 visits.

The hospital's Departments of Cardiovascular Diseases, General Surgery, and Ophthalmology are designated as Beijing key TCM specialties. The hospital has established the Academic Inheritance Studio of Gao Sihua, a National Renowned TCM Physician and Qihuang Scholar, and the Yao Wuda Famous Physician Research Studio, a construction project under the Beijing TCM "Inheritance 3+3 Program". Drawing on the clinical experience of renowned senior TCM physicians, the hospital is applying for approval of the in-house TCM preparations Honghua Shenjin Powder and Shenge Tongmai Granules. The group standard "Technical Specifications for the Operation of Abdominal Lifting and Compression Cardiopulmonary Resuscitation", led and formulated by the hospital, has been officially approved and issued.

北京市隆福医院
Beijing Longfu Hospital

医院始建于 1931 年建立，地处东城区 核心区域，是一所集医疗、康复、护理、教学、科研、预防为一体的三级甲等中西医结合医院，为北京市首批老年医院，建立“老、危、微、养”分层连续管理模式，编制床位 480 张，年门急诊量 50 万人次。

医院拥有国家级推广研发基地二个和市级重点专科 2 个。医院自创“福御和气针法”，开展的东城非遗项目“鍉圆针痧疗”，获 7 项专利，并建立市级“中医药传统技能传承工作室”。研发数智中医亚健康调摄规划师及中医 AI 医生，获 2024 全球数字经济大会数字中医药应用场景案例”、“2025 北京市人工智能行业发展典型案例”、“2025 年中关村科学城人工智能全景赋能应用案例”、“东城区第一批杏巷礼物”8 项荣誉。并积极研发数智中医中英双语模式，为传统中医走上国际舞台奠定基础。

2025 年北京协和医院“一带一路”国际友人来我院参观交流，北京市隆福医院作为医联体单位展示非遗技术“鍉圆针系统痧疗”，体现中医传统文化的博大精深，深受国外友人喜爱。该非遗技术参与近 20 场义诊宣教、中医药非遗主题展、文化遗产日活动及“一带一路”国际交流，广受大众认可。

Diyuan Needle System Sha Therapy at the “Belt and Road” International Visitors Exchange Event at Peking Union Medical College Hospital on October 16, 2025

Beijing Longfu Hospital was established in 1931 and is located in the central area of Dongcheng District. It is a Grade A tertiary hospital of integrated traditional Chinese and Western medicine, integrating medical care, rehabilitation, nursing, teaching, scientific research, and disease prevention. As one of the first hospitals for older adults in Beijing, the hospital has established a tiered and continuous management model for the "elderly, critically ill, mildly ill, and those requiring care". It has 480 authorized beds and receives approximately 500,000 outpatient and emergency visits annually.

The hospital has two national-level research, development, and promotion bases and two municipal-level key specialties. It has independently developed the "Fuyu Heqi Acupuncture Technique" and carries out the Dongcheng District intangible cultural heritage project "Diyuan Needle System Sha Therapy". The technique has obtained seven patents, and the hospital has established a municipal-level Traditional Chinese Medicine Traditional Skills Inheritance Studio. The hospital has developed a digital and intelligent TCM sub-health conditioning planner and a TCM AI physician. It has received eight honors, including the "Digital TCM Application Scenario Case" at the 2024 Global Digital Economy Conference, the "2025 Typical Case for the Development of the Artificial Intelligence Industry in Beijing," the "2025 AI-Powered Panoramic Empowerment Application Case of Zhongguancun Science City," and the "Xingxiang Gifts" recognition, the first batch in Dongcheng District. The hospital is also actively developing a bilingual Chinese-English model for digital and intelligent TCM, laying a foundation for traditional Chinese medicine to enter the international arena.

In 2025, during the Belt and Road international exchange event for international visitors organized by Peking Union Medical College Hospital, Beijing Longfu Hospital, as a medical alliance partner, presented the intangible cultural heritage technique "Diyuan Needle System Sha Therapy", demonstrating the profound and extensive heritage of traditional Chinese medicine and receiving a positive response from international visitors. This intangible cultural heritage technique has participated in nearly 20 free medical consultations and public education activities, TCM intangible cultural heritage-themed exhibitions, Cultural and Natural Heritage Day events, and Belt and Road international exchanges, and has received broad public recognition.

Beijing Huairou Hospital of Traditional Chinese Medicine was established in June 1985 and was officially approved as a Grade A tertiary hospital of Traditional Chinese Medicine in 2021. The hospital has 400 authorized beds, 24 clinical departments, and 7 medical technology departments, with an annual outpatient volume of over 650,000 visits.

The hospital is home to 2 key specialties designated by the National Administration of Traditional Chinese Medicine, 5 Beijing municipal-level key specialties, 2 capital regional specialties under the Beijing National Key TCM Specialty Radiation Project (1+X+N), and 1 capital regional characteristic specialty. It also hosts 2 national inheritance studios for renowned grassroots veteran TCM experts and 5 grassroots veteran TCM inheritance studios under the Beijing Traditional Chinese Medicine "Torch Inheritance" 3+3 Project. A stroke center and a chest pain center have been established. Over the past ten years, the hospital has received exchange visitors from 19 countries and regions. Visitors from countries including the Czech Republic, Egypt, Malaysia, South Africa, Pakistan, Nepal, Panama, Cambodia, Laos, and the Democratic People's Republic of Korea have visited the hospital for TCM exchange activities. They observed the processing and decoction of Chinese herbal medicines, practiced identifying Chinese medicinal materials, experienced various TCM appropriate technologies, and immersed themselves in the profound heritage and innovative achievements of Traditional Chinese Medicine at the TCM Culture Experience Hall.

中国人民大学留学生团体调研访问潞城中心
International Student Group from Renmin University of China Visiting Lucheng Community Health Service Center for Research and Exchange

Established in 1965, Beijing Tongzhou Lucheng Community Health Service Center serves 150,000 residents across 3 subdistricts and towns. It operates 5 community health service stations and has an annual outpatient volume of 370,000 visits. The center has established 3A outpatient clinics for immunization and maternal and child health care.

The center's Department of Traditional Chinese Medicine (TCM) has a rehabilitation and treatment area, with more than 10 symptom-focused clinics for conditions such as constipation, insomnia, neck and shoulder pain, obesity, and vertigo, as well as 6 Beijing municipal-level specialty clinics with distinctive TCM features, including osteoporosis and pediatric Tui Na. The center provides 28 TCM appropriate technologies, including acupuncture, moxibustion plastering, heat-sensitive moxibustion, auricular point pressing with pellets, and topical application of Chinese herbal medicine. In 2025, the center provided TCM health management services totaling 1,866 person-visits for children aged 0–36 months and 7,494 person-visits for residents aged 65 and above within its jurisdiction.

The center has hosted participants in training programs for local health officials from developing countries for visits and exchange activities, including experiences with distinctive TCM therapies. It has also hosted research and experiential activities for international students majoring in public health at the Tongzhou Campus of Renmin University of China.

第九届驻华使节中医药健康日
The 9th Traditional Chinese Medicine Health Day for Diplomatic Envoys in China

外交官中医药市集沙龙
TCM Market Salon for Diplomats

Since its establishment in December 2015, Guoyihui has remained committed to the philosophy of preserving the essence of traditional Chinese medicine (TCM), integrating it with modern health concepts, and showcasing the essence of TCM to the world. It provides a range of services, including TCM diagnosis and treatment, medical aesthetics, community healthcare, and cultural dissemination. Guoyihui is a TCM medical service institution for foreign guests designated by the Beijing Foreign Affairs Service Bureau and the DRC Alliance. It is also a “Demonstration Unit for the Expanded Opening-up of Beijing's Service Sector” and a “Beijing Demonstration Base for TCM Culture and Tourism”.

Guoyihui carries out distinctive TCM trade in services initiatives. It has signed TCM health service agreements for diplomats' families with embassies in China from 83 countries, including India and Slovakia, providing TCM medical and public health services. It has also established a presence at the Asian Infrastructure Investment Bank, providing services to bankers, financiers, and professionals from its 109 member countries. Guoyihui's TCM health services cover 174 embassies in China, 20 United Nations agencies in China, and 113 international organizations. To date, it has provided services to foreign guests, including ministerial-level officials, ambassadors, and diplomats, on a cumulative basis of 20,585 person-visits.

Guoyihui has independently developed initiatives such as “TCM Culture in Embassies”, “Private TCM Health Classes for Diplomatic Envoys in China”, and “TCM Market Salon for Diplomats”. These initiatives have attracted active participation from diplomats of embassies in China from nearly 100 countries, cultivated a group of “TCM Cultural Ambassadors” with international influence, promoted TCM culture globally, and established a distinctive TCM diplomatic service brand with strong Chinese characteristics.

中国中医科学院
China Academy of Chinese Medical Sciences

中国中医科学院
China Academy of Chinese Medical Sciences

中国中医科学院（原名中国中医研究院），成立于 1955 年，是国家中医药管理局直属的集科研、医疗、教学为一体的综合性中医药研究机构。现设 23 个内设机构，13 个二级法人机构，4 个非法人机构，4 个院本部直属机构以及 3 个挂靠学会。

建院以来，在中医药基础理论、重大疾病防治及中药新药研发等方面取得了显著成就。拥有道地药材品质保障与资源持续利用全国重点实验室等一批实验室、重点研究室和研究基地。主办和承办 20 种全国性中医药专业期刊。获得院外各级科技奖励 1124 余项，其中国家科学技术进步奖 55 项。附属 6 家医疗机构开放床位 3000 余张，年门（急）诊总量近 900 万人次。

中国中医科学院是中医药高层次人才的聚焦地和重要培养基地，屠呦呦研究员荣获诺贝尔生理学或医学奖、国家最高科学技术奖、“共和国勋章”。现有中医学、中西医结合、中药学三个一级学科所涵盖的博士、硕士学位授予权，正在积极推进中国中医科学院大学建设。联合 11 所中医药高等院校，共同建设中国中医药联合研究生院。

作为对外合作交流的重要窗口，与 50 多个国家（地区）签署了 200 余项合作协议，建立 6 个国家级中医药海外中心和 6 个国家级国际合作基地。与奥地利共建“一带一路”联合实验室、与瑞典共建国际联合实验室。开展“本草惠澜湄”和“中医针灸进澜湄”项目。与世卫组织共同建立 3 个传统医学合作中心，“国际传统医学临床试验注册平台”已成为世卫组织国际临床试验一级注册平台。国际培训学员覆盖国家百余个。

2015 年 12 月，中国中医科学院屠呦呦研究员获得 2015 年诺贝尔生理学或医学奖
In December 2015, Researcher Tu Youyou from CACMS was awarded the 2015 Nobel Prize in Physiology or Medicine.

2023 年 5 月，中国中医科学院派出的中国援柬埔寨中医抗疫医疗队获颁柬埔寨骑士勋章
In May 2023, the Chinese medical team dispatched by CACMS to Cambodia to fight against COVID-19 was awarded the Chivalric from Cambodia.

Founded in 1955, China Academy of Chinese Medical Sciences (CACMS) is a comprehensive traditional Chinese medicine research institution directly affiliated to the National Administration of Traditional Chinese Medicine (NATCM) and the main task includes scientific research, medical treatment and training. It has 23 internal departments, 13 secondary legal entities, 4 unincorporated organizations, 4 institutions directly under CACMS, and 3 affiliated societies.

Since its establishment, CACMS has made remarkable achievements in areas such as the basic theory of traditional Chinese medicine (TCM), the prevention and treatment of major diseases and the R&D of new TCM drugs. It has a number of laboratories, key research laboratories and research bases, including the National Key Laboratory of Quality Assurance of Authentic Medicinal Materials and Their Sustainable Utilization. It also sponsors and hosts 20 national TCM professional journals. It has won more than 1124 scientific and technological awards at all levels from external sources, including 55 National Science and Technology Progress Awards. The Academy is affiliated with six medical institutions that offer more than 3,000 beds, handling nearly 9 million outpatient and emergency visits annually.

CACMS is a hub and important training base for high-level talents in TCM, with its credit further enhanced by Tu Youyou's Nobel Prize in Physiology or Medicine, the National Highest Science and Technology Award, and the “Medal of the Republic”. Currently, CACMS offers doctoral and master's degree programs across three primary disciplines, namely, TCM, Integrated Chinese and Western Medicine, and Chinese Materia Medica, and is actively promoting the construction of the University of China Academy of Chinese Medical Sciences. It has joined hands with 11 institutions of higher education in TCM to build the Joint Graduate School of Traditional Chinese Medicine of China.

As an important window for foreign cooperation and exchanges, it has signed more than 200 cooperation agreements with more than 50 countries (regions), and established 6 state-level TCM overseas centers and 6 state-level international cooperation bases. It collaborates with Austria to build a joint laboratory under the Belt and Road Initiative and partners with Sweden to establish an international joint laboratory. Projects such as “Herbal Medicine Benefits Lancang-Mekong Regions” and “Acupuncture and Moxibustion Enters Lancang-Mekong Region” have been carried out. Three traditional medicine cooperation centers have been established with WHO, and the International Clinical Trials Registration Platform for Traditional Medicine has become the first-level registration platform for international clinical trials recognized by WHO. Participants of its international training program come from over a hundred countries.

2024 年 9 月，中国中医药联合研究生院在苏州揭牌
In September 2024, Joint Graduate School of Traditional Chinese Medicine of China was inaugurated in Suzhou.

2023 年 9 月第十二届世界微循环大会
The 12th World Congress of Microcirculation, September 2023

Peking University Health Science Center (PUHSC) originated from the National Beijing Medical College founded in 1912, which was the first medical school in China dedicated to teaching Western medicine established by the Chinese government relying on its own strength. PUHSC comprises the School of Basic Medical Sciences, the School of Pharmaceutical Sciences, the School of Public Health, the School of Nursing, and the School of Medical Humanities, and six directly affiliated hospitals (clinical medical colleges). PUHSC currently offers 80 doctoral degree programs, 86 master's degree programs, and has 9 postdoctoral research stations.

PUHSC has established the Department of Integrated Traditional and Western Medicine, the Department of Natural Pharmaceutical Sciences, the Institute of Integrated Traditional and Western Medicine at Peking University, and the Research Institute of Integrated Traditional and Western Medicine at PUHSC, along with the clinical department of integrated traditional and Western medicine in the affiliated hospitals. It has set up the Key Research Laboratory of Phlegm-Blood Stasis, the Microcirculation Laboratory, and the traditional Chinese medicine pharmacology laboratory (oncology) under the State Administration of Traditional Chinese Medicine. The research focuses on the effects and mechanisms of TCM in preventing and treating geriatric diseases, digestive system diseases, respiratory system diseases, gynecological reproductive diseases, and tumors, as well as the scientific connotations of cold-heat differentiation and blood stasis with blood-activating and stasis-resolving therapies. Thanks to these efforts made in promoting the application of TCM in the prevention and treatment of major diseases, it once ranked first in terms of influence among international research institutions in the field of microcirculation. Professor Xie Zhufan has served multiple times as a traditional medicine consultant for the World Health Organization (WHO), edited 23 English dictionaries and monographs on TCM, and promoted cultural exchanges between the East and West.

首都国医名师馆
Hall of Capital TCM Master Physicians

The School of Traditional Chinese Medicine of Capital Medical University is the only institution among Beijing's municipal medical colleges that specializes in cultivating advanced TCM professionals. It has been offering undergraduate education in TCM for 45 years and graduate education for 30 years. In 2012, it was approved to offer a doctoral degree program in natural drug science, and in 2015, it gained authorization for a doctoral professional degree program in TCM. The school has trained nearly 10,000 advanced TCM professionals for the Beijing area.

It consists of 6 academic departments, 1 experimental teaching center, and 1 TCM research institute. Currently, there are over 90 faculty members. The school places great emphasis on the inheritance of renowned medical scholars' academic traditions and the cultivation of talents. The School of Traditional Chinese Medicine and its affiliated hospitals boast 3 national TCM master physicians, 6 national famous TCM practitioners, 56 mentors for the inheritance of academic experience from TCM experts nationwide, 44 TCM master physicians of the Capital, and 39fFamous TCM practitioners of the capital. There are 44 national-level and 38 municipal-level studios for the inheritance of renowned TCM experts' academic traditions, as well as 1 municipal-level cultural inheritance studio.

In the past five years, 99 projects have been approved at various levels, including 47 national projects including National Major New Drug Innovation Program, National Key R&D Program, National Natural Science Foundation, and National Excellent Youth Fund. There are also 20 provincial-level projects, 16 bureau-level projects. It has filed for 43 patents, with 28 patents granted, published 382 papers in core journals, 215 papers in SCI journals, and served as the editor-in-chief, associate editor, or contributor to 118 textbooks, teaching references, or monographs. It is now the academic organizer of Future Integrative Medicine (FIM).

2023 年 6 月举办的第四十三届肯尼亚药师学会年度科学会议上的以岭药业展台
The booth of Yiling Pharmaceutical at the 43rd Annual Scientific Conference of the Pharmaceutical Society of Kenya held in June, 2023

Yiling Pharmaceutical was founded in 1992. The company has developed more than ten patented new drugs, including ongxinluo Capsules, Shensong Yangxin Capsules, Qili Qiangxin Capsules, Lianhua Qingwen Capsules and Bazi Bushen Capsules, and has obtained over 800 patents. It has won six national awards, including the First Prize and Second Prize of National Science and Technology Progress. The company is among the top 10 China TCM Enterprises, the top 20 China Pharmaceutical Listed Enterprises, and the top100 Most Valuable Chinese Brands.

Yiling has established five production and R&D bases in Hebei, Beijing, and Shanghai, and has set up more than 50 raw material bases for Chinese medicinal herbs across the country. Its production workshops have successively passed international certifications of the United States, the European Union, Canada, and other countries and regions, establishing a comprehensive quality control system that meets international standards. Lianhua Qingwen is available in more than 30 countries.

For the first time, the company has systematically constructed the Luobing (collateral disease) theory and established the operation mode integrating theory, clinical treatment, scientific research, industry and teaching, and the TCM diagnosis and treatment of Luobing in Chinese medicine has been listed in the national intangible cultural heritage. Besides, the book ofLuobing Theory has become a textbook for college students, and has been taught in more than 40 colleges and universities in China.

The International Conference on Luobing Theory has been held for 20 consecutive years, which has become a landmark academic conference for the TCM to go overseas. Furthermore, experts collaborating with Yiling Pharmaceutical on scientific research have shared innovative research achievements in theory of Luobing multiple times at top international academic conferences, such as the AHA and the ESC. Related articles have also been published in authoritative medical journals like JAMA and Nature Medicine.

国药华邈生产加工
Production and processing of Sinopharm Group Beijing HuaMiao

Founded in 1995, Sinopharm Group Beijing Huamiao Pharmaceutical Co., Ltd. is a high-tech enterprise integrating R&D, production, decoction, packaging, and marketing of Chinese medicinal herbs, processed herbs, and Chinese patent medicine. It was the first company in Beijing and the second in China to obtain certification for the production of processed Chinese herbs. The company is a subsidiary of China National Pharmaceutical Group Corporation (Sinopharm) through its wholly-owned subsidiary China Traditional Chinese Medicine Holding Company Limited.

The company is designated by the Beijing Municipal Medical Products Administration as one of the producers authorized to process and manufacture 28 types of toxic Chinese medicinal herbs, including Pinellia, aconite, Sichuan aconite, grass aconite and Strychnos. It holds legal resource certificates for the processing of endangered wild animal materials such as antelope horn and musk, and can produce over 600 varieties of processed Chinese herbs. One of its key TCM formulations, Qili Capsules, as an exclusive variety, has been included in the national medical insurance directory. The company has established a production quality control system ensuring that its products are "authentic, safe, effective, and consistent." High-quality and reasonably priced "Huamiao" branded products have entered major hospitals in Beijing.

The Beijing Museum of Traditional Chinese Medicine Processing Techniques, owned by the company, is the first modern museum in the industry dedicated to the inheritance and promotion of traditional Beijing-style TCM processing techniques. It is recognized as part of the second batch of national TCM processing technique inheritance bases, a central enterprise patriotic education base, and a Beijing TCM tourism demonstration base. The museum conducts TCM popularization activities for various levels of Party and government organs, enterprises and institutions, higher education institutions, primary and secondary schools, and kindergartens. It also welcomes foreign scholars, experts, and tourists for visits and exchanges.

Production and processing site

Xinglin Pharmaceutical was established in 2003 as a state-controlled enterprise subordinate to Beijing Hospital of Traditional Chinese Medicine , and it is a GMP-compliant producer of processed Chinese herbal slices. The company is recognized as a "High-Tech Enterprise" and an "Enterprise that use special and sophisticated technologies to produce novel and unique products" in Beijing, and it functions as a base for TCM cultural tourism in Beijing and Tongzhou District, as well as a science popularization base in Tongzhou District.

外事团队参观学习
Foreign affairs teams coming for visiting and studying

The enterprise, together with Beijing Institute of Traditional Chinese Medicine and Beijing Hospital of Traditional Chinese Medicine, carries out the research on the database of Beijing-style processing inheritance, develops special processing technology, etc., and is approved as the inheritance base of TCM processing technology by the National Administration of Traditional Chinese Medicine. The company continues to advance the development of TCM slice production equipment, having obtained more than 30 patents. Xinglin Pharmaceutical collaborates with the Institute of Traditional Chinese Medicine of the CACM on the study of food-as-medicine slices and works with the Chinese Association of Traditional Chinese Medicine on the research of processing adjuvant standards. It has also participated in the formulation of TCM slice processing standards in Beijing for multiple times.

Within its premises, the company has built the Xinglin Herb Garden, a TCM culture corridor, a TCM specimen exhibition hall, a TCM experience center, and a TCM culture restaurant, forming an integrated service chain that combines TCM research, production, and experience. Additionally, the company serves as an educational internship site for Hebei North College and Beijing Health Vocational College, as well as a resource unit for the "Primary and Secondary School Large Classroom" program in Tongzhou District. In recent years, it has received tens of thousands of visits from enterprises, institutions, schools, colleges and foreign teams.

建昌帮药业有限公司
Jianchangbang Pharmaceutical Co., Ltd.

建昌帮药业成立于 1992 年，是北京创盈科技产业集团旗下全资子公司，一家集研发、生产、销售于一体的医药制造企业。公司于 1996 年被认定为“中华老字号”，系第一批中华老字号名录中唯一一家中药饮片厂，至今已获得“国家非物质文化遗产”“全国中医药文化宣传教育基地”“国家高新技术企业”等多项荣誉。公司以品牌为核心，布局中药饮片生产销售、中药代煎服务、大健康产品生产销售等板块，尤以中药饮片为主营业务，已开发生产特色炮制饮片“四附六”及 700 余味普通饮片。

2022 年 3 月 8 日东华理工大学国际学生走进建昌帮
March 8, 2022: International Students from East China University of Technology Visit Jianchang School

“建昌帮”源于北宋（1072 年），是我国南方古药帮、全国中药炮制四大流派之一，以擅长传统饮片加工炮制，炮制精良著称。民间素有“建昌认同是金规，不过建昌药不灵”之说，其炮制技艺在港、粤、台、东南亚及欧美地区广泛使用。建昌帮拥有炮制十六法，其中炆法独具本帮特色，经炆法炮制的何首乌、地黄、黄精、远志等饮片质量广受行业认可，科学研究证实炆何首乌在减毒增效方面显著优于常规何首乌。企业出版专著《建昌帮传统中药炮制法》，参与起草和修订国家和省级中药饮片炮制规范 70 余项，拥有专利 128 项，其炮制技艺曾获“科学技术进步奖一等奖”、“江西省科技进步奖一等奖”。目前，建昌帮特色炮制饮片已供应北京地区近百家医院，并积极参与上海合作组织传统医学论坛等国际活动，受到广泛关注，已与多国开展交流合作。

International friends operate the characteristic Jianchang School processing tools, the Jian Dao (Chinese medicine knife) and Leigong Bao (Leigong planer).

Jianchangbang Pharmaceutical, established in 1992, is a wholly owned subsidiary of Beijing Chuangying Technology Industry Group. As a pharmaceutical manufacturing enterprise integrating research and development, production, and sales, the company was recognized as a "China Time-honored Brand" in 1996 and was the only Chinese herbal decoction pieces manufacturer included in the first batch of the China Time-honored Brand list. It has also received a number of honors, including recognition related to a "National Intangible Cultural Heritage" item, designation as a "National TCM Culture Publicity and Education Base", and recognition as a "National High-Tech Enterprise". With its brand at the core, Jianchangbang operates in areas including the production and sale of Chinese herbal decoction pieces, decoction services for Chinese herbal medicines, and the production and sale of health and wellness products, with Chinese herbal decoction pieces as its principal business. The company has developed and produced the distinctive processed decoction pieces known as "Si Fu Liu", as well as more than 700 varieties of conventional Chinese herbal decoction pieces.

Originating in 1072 during the Northern Song Dynasty, Jianchangbang is one of the ancient medicinal schools in southern China and one of the four major schools of Chinese herbal medicine processing in China. It is renowned for its expertise in the traditional processing and preparation of Chinese herbal decoction pieces and for its meticulous processing techniques. There is a traditional saying that recognition by Jianchangbang was regarded as the gold standard, while medicines not recognized by Jianchangbang were considered ineffective. Its processing techniques have been widely used in Hong Kong, Guangdong, Taiwan, Southeast Asia, Europe, and the Americas. Jianchangbang has 16 processing methods, among which the Wen method is particularly distinctive. Chinese herbal decoction pieces such as processed Polygonum multiflorum, Rehmannia root, Polygonatum, and Polygala root prepared using the Wen method are widely recognized for their quality within the industry. Scientific research has demonstrated that processed Polygonum multiflorum prepared using the Wen method is significantly superior to conventionally processed Polygonum multiflorum in reducing toxicity and enhancing efficacy. The company has published the monograph Traditional Processing Methods of Chinese Herbal Medicines by Jianchangbang and has participated in the drafting and revision of more than 70 national- and provincial-level standards for the processing of Chinese herbal decoction pieces. It holds 128 patents, and its processing techniques have received the First Prize of the Science and Technology Progress Award and the First Prize of the Jiangxi Provincial Science and Technology Progress Award. Today, Jianchangbang's distinctive processed Chinese herbal decoction pieces are supplied to nearly 100 hospitals in Beijing. The company also actively participates in international activities such as the Traditional Medicine Forum of the Shanghai Cooperation Organization and has conducted exchanges and cooperation with multiple countries.

Wantai Like, established in 2013, specializes in the entire industrial chain of traditional Chinese medicine (TCM), with production of processed herbal slices and TCM formulations as its main business. The company also operates Baoshantang Traditional Chinese Medicine Hospital in Changping District and has developed the "Yaowang Valley" TCM cultural tourism base in Shisanling Town. Wantai Like has received numerous honors, including a Zhongguancun high-tech enterprise and a SME that uses special and sophisticated technologies to produce novel and unique products in Beijing.It serves as a board member of several associations, including the Chinese Association of Traditional Chinese Medicine. The company holds 35 intellectual property rights, including 2 invention patents.

瑞典考察团
Expedition to Sweden

Currently, the company produces over 800 varieties and more than 2,000 specifications of processed herbal slices, as well as 6 types of TCM formulations. It has built the first smart decoction center in Changping District, capable of processing up to 16,000 prescriptions per day. Baoshan Tang TCM Hospital is known for its specialized diabetes foot department. The hospital's self-developed product for treating diabetic foot has been granted a national invention patent and won an award for excellence at the Panama International Exposition. Yaowang Valley is planned to include a demonstration zone for Chinese herbal medicine planting, a TCM culture museum, and an outdoor fitness and sightseeing area for TCM science popularization. The valley is home to a large number of original tree species over 100 years old, and the company has established six understory planting bases in Changping District.

The company mainly serves more than 300 medical institutions in Beijing, Tianjin, Hebei and Yangtze River Delta, including nearly 30 public tertiary hospitals. In recent years, the company has received foreign delegations from Taiwan, Vietnam, Sweden, the Netherlands, the Czech Republic and other regions, totaling about 400 people.

44 北京本草方源药业集团有限公司
Beijing Bencao Fangyuan Pharmaceutical Group Co., Ltd.

北京本草方源药业集团成立于 2004 年，占地面积 3 万平方米，经营品种达 1000 多种，是国家级高新技术企业，北京市专精特新企业，是一家大型的中药饮片生产、销售企业。拥有现代化中药饮片炮制车间，检验中心通过 CNAS 认证，年产达 8000 吨。

企业全景
Enterprise panorama

企业在中医药理论指导下，炮制传统中药饮片。具有全面的中药饮片产品线，常年生产品种 700 种，满足各类医疗机构临床需求。针对当下有医疗保健需求的高端人群推出了精制中药饮片及有机中药饮片。

企业设有智能煎药中心，配有千台煎药机和自动化煎制系统，采用古法散煎煎煮方式，运用智能制造、大数据、物联网等技术手段，实现接方、调剂、加水、浸泡、煎煮、包装等全过程智能化，设计日产能 10000 张处方，服务北京市六十多家医疗机构。该煎药中心可生产汤剂、水丸、蜜丸、膏滋丸等剂型，并研发新剂型中药复方颗粒。该剂型将传统煎煮汤剂通过冻干技术制作成粉剂，不添加任何辅料，便于携带、储存和服用。经清华大学药学院研究测试，该剂型成分及药效等同于传统煎煮汤剂。

企业多次参与国际中医药合作论坛，展示传统中医药文化，并与新西兰、加拿大等国家进行中药贸易往来。

质检中心
Quality inspection Center

国际交流
International exchange

Beijing Bencao Fangyuan Pharmaceutical Group was established in 2004 and covers an area of 30,000 square meters. It operates over 1,000 varieties of products and is recognized as a national high-tech enterprise and an enterprise that uses special and sophisticated technologies to produce novel and unique products in Beijing. The company is a large-scale producer and distributor of processed Chinese herbal slices. The company possesses a modern processing workshop for TCM slices, and its inspection center has obtained CNAS certification. It has an annual production capacity of 8,000 tons.

The company processes traditional TCM slices under the guidance of TCM theory. It offers a comprehensive range of TCM slice products, with over 700 varieties in regular production, meeting the clinical needs of various medical institutions. The company has introduced refined and organic Chinese medicine tablets for people with high requirements on health care.

The enterprise has an intelligent decoction centre, equipped with 1,000 sets of decocting machines and automated decoction systems, which adopts the ancient method of bulk decoction and applies intelligent manufacturing, big data, Internet of Things and other technological means to realize the intelligence of the whole process of receiving prescriptions, mixing, adding water, soaking, decocting, packaging, etc. It has a design capacity of 10,000 prescriptions per day, serving more than 60 medical institutions in Beijing. The decoction centre can produce dosage forms such as soup, water pills, honey pills and ointment pills, and develop new dosage forms of Chinese medicine compound granules. This dosage form is made by freeze-drying the traditional decoction into powder without adding any auxiliary materials, which is easy to carry, store and take. After research and testing by the School of Pharmaceutical Sciences, Tsinghua University, the composition and efficacy of this dosage form are equivalent to the traditional decocted soup.

The company has participated in many international Chinese medicine co-operation forums, demonstrated TCM culture to the world, and traded Chinese medicine with New Zealand, Canada and other countries.

During the COVID-19 epidemic, Chunfeng Pharmaceutical donated traditional Chinese medicine formula granule preventive drugs to North American Alumni Association, American Alumni Association, European Alumni Association of Beijing University of Chinese Medicine .

Beijing Chunfeng Pharmaceutical Co., Ltd., located in Huairou Science City, Beijing, primarily engages in the R&D, production, and sales of processed Chinese herbal slices, TCM formula granules, TCM formulations, and chemical drugs. The company adheres to an "TCM-first strategy" and has developed into a modern innovative TCM pharmaceutical enterprise with comprehensive industrial functions and a complete TCM industrial chain. The company has been recognized as a national high-tech enterprise and a SME that uses special and sophisticated technologies to produce novel and unique products in Beijing. It has also been certified as a "Pilot Construction Base for TCM Technology Transfer and Intellectual Property Protection" in Beijing.

Beijing Chunfeng Pharmaceutical offers over 1,100 varieties of traditional processed herbal slices and more than 520 varieties of TCM formula granules. Its TCM formulations include Sugar-Free Double Yellow Lotus Granules and Ice Pupa Tongmai Lozenges. The company's products are distributed to nearly 4,000 hospitals and over 7,000 clinics nationwide, providing a wide range of TCM products and value-added services such as TCM decoction and custom-formula processing to medical institutions at home and abroad.

Chunfeng Pharmaceutical collaborates with 58 universities and research institutions to engage in industry-academia-research collaboration and technology transfer, such as Beijing University of Chinese Medicine (BUCM), China Academy of Chinese Medical Sciences (CACMS), Beijing Hospital of Traditional Chinese Medicine, Guang'anmen Hospital, and China-Japan Friendship Hospital, among others. In September 2024, the Beijing Administration of Traditional Chinese Medicine, the Beijing Municipal Drug Administration, and the Beijing Science and Technology Commission approved Chunfeng Pharmaceutical to establish the "Beijing TCM Formulation CDMO Common Technology Center." This center will provide "one-stop and full-chain" TCM research and technology services to research entities.

The company has successively donated TCM formula granules for epidemic control to Armenia, Serbia, Costa Rica, and the alumni associations of Beijing University of Chinese Medicine (BUCM) in the United States, actively participating in international TCM exchange activities.

Foreign Chinese medicine enthusiasts watch the process of Chinese medicine production

Beijing Sifang Traditional Chinese Herbal Medicine Slices Co., Ltd. was established in 2005, which is a Chinese medicine tablet manufacturer built on modern enterprise management concept. The scope of production includes sixteen categories and hundreds of varieties, such as common Chinese medicine tablets, direct oral tablets and toxic Chinese medicine tablets, with an annual production capacity of more than 2,000 tonnes.

The company is characterized by its respect for traditional processing culture and has established a studio for Master Jin Shiyuan, a national-level intangible cultural heritage inheritor. It has developed ancient processing techniques for wine-processed Polygonatum (Huang Jing) and has formed a series of traditionally processed products, including wine-processed Polygonatum and processed Rehmannia (Shu Di Huang). The company has obtained the titles of Beijing New Technology and New Products, Brand Products of China Association of Traditional Chinese Medicine, as well as more than twenty national invention patents. In 2023, the company's wine-processed Polygonatum processing technique was listed as an intangible cultural heritage of Fangshan District, Beijing.

The company has created the Sifang TCM Culture Museum, which houses over ten thousand exhibits, including medical books from different periods, traditional TCM processing tools, medicinal specimens, various models and molds, ethnic minority medical instruments, ancient replicas of the "Eight Ancient Items", and old signboards. The museum has been rated as the fourth batch of TCM cultural tourism demonstration bases in Beijing and a science popularization education base in Yan Mountain, Fangshan District. Additionally, it has been selected as a practical teaching base by Beijing University of Chinese Medicine, Capital Medical University, and Beijing Forestry University. It has also been chosen as an internship base by the French Traditional Chinese Medicine Energy Academy, the European Foundation of Chinese Medicine in Spain, and the Brazilian Oriental Cultural Exchange Center.

Founded in May 1950, Beijing Association of Chinese Medicine, as one of the largest academic organizations of Chinese medicine in Beijing, insists on uniting the majority of Chinese medicine scientists and technicians, and plays an active role in promoting the inheritance and innovation, discipline development, science popularization, talents cultivation, external exchanges, and professional journals editing regarding Chinese medicine in Beijing.

The Association is a 5A association of Beijing Municipal Bureau of Civil Affairs, selected as one of the first founding organizations of Beijing Science and Technology Association as "First-class Association with Specialties in Beijing", and awarded as "Beijing Professional and Technical Personnel Continuing Education Base" by Beijing Municipal Bureau of Human Resources and Social Security. The Association has more than 20,000 individual members, 117 group members, 73 branches, and more than 3,600 traditional Chinese medicine experts and scholars in Beijing. It carries out more than 100 academic activities and continuing education training courses each year, with more than 10,000 participants. It has continued to publicize and popularize the Chinese medicine culture, and pushes more than 140 articles on traditional Chinese medicine health science knowledge every year.

The Association has long been concerned about the international exchanges, cooperation and cultural dissemination of Chinese medicine, and has established the International Cooperation and Language Dissemination Working Committee and the Working Committee on Trade in Chinese Medicine Services, organized experts to participate in international academic activities such as the "Fourth Canadian International Forum on Traditional Chinese Medicine and Health" in Canada, and held the "Beijing International Chinese and Western Medicine Treatment for Digestive Disease Summit Forum" and the "International Qihuang Men's Medicine Forum".

北京中西医结合学会
Beijing Association of the Integrating of Traditional and Western Medicine

北京中西医结合学会成立于 1981 年 7 月，学会的宗旨是积极团结广大医务工作者，为北京地区中医、中西医结合事业搭建学术交流平台，进行人才培养，促进成果转化；同时，通过组织各种活动，宣传中医药文化，为市民进行健康科普。

学会下设 88 个专业委员会，每年大约开展 300 场学术交流活动，常年组织西医学习中医、西医合理规范使用中成药等培训，推动中医、西医两种医学体系的有机结合，促进中西医的优势互补及相互融合。

北京中西医结合学会
Beijing Association of the Integrating of Traditional and Western Medicine

为推动中西医结合医学与国际接轨，促进中西医结合人才的国际交流，学会成立了国际交流与技术合作专业委员会，与国际一流的临床、科研、教育机构开展学术交流，尤其是深化中医药与欧美、“一带一路”国家传统医学的互学互鉴。近年来，学会成功举办了朝阳区亮马河国际风情水岸经济带中医药（传统医药）系列活动、中医药特色人才培养高级研修班等活动，发布了名医故里文化传播与国际产业联合体、“北京中西医结合联动工作室”服务行动等。

国际学术交流培训
International academic exchange and training

为巴基斯坦驻华大使馆官员及家属义诊
Free clinic for officials of the Pakistani Embassy in China and their families

The Beijing Association of the Integrating of Traditional and Western Medicine was founded in July 1981, with the aim of actively uniting the medical workers, building an academic exchange platform for the cause of Chinese medicine and integrative medicine in Beijing, cultivating talents and promoting the transformation of achievements; and promoting the culture of Chinese medicine through organizing a variety of activities, and carrying out health science popularization for the public.

With 88 professional committees, the Association conducts about 300 academic exchanges every year, organizes training for Western doctors to learn Chinese medicine and Western doctors to use proprietary Chinese medicines in a rational and standardized manner, committed to promoting the organic combination of both Chinese medicine and Western medicine systems, and to promoting the complementarity of the strengths of Chinese and Western medicine as well as their mutual integration.

For the integrated Chinese and Western medicine to be geared to international standards and encourage international exchange of integrated Chinese and Western medicine talents, the Association has established a professional committee for international exchange and technical cooperation for academic exchanges with world-class clinical, scientific research and education institutions, especially to deepen the mutual learning between Chinese medicine and traditional medicine in Europe, America and the countries along the “Belt and Road”. In recent years, the Association has successfully organized a series of activities on Chinese medicine (traditional medicine) in the Liangma River International Style Waterfront Economic Zone in Chaoyang District, senior training classes for talents with traditional Chinese medicine characteristics, and other activities, and released the cultural communication of famous doctors' hometown and international industrial complex, and the service action of “Beijing Integrated Traditional Chinese and Western Medicine Linkage Studio”.

北京中医药养生保健协会
Beijing Healthcare Association of Traditional Chinese Medicine

北京中医药养生保健协会成立于 2014 年，是由北京地区从事中医药养生企业、科研开发单位和中医养生保健行业专家、注册执业中医师等自愿组织建立的非营利性社会组织。协会获评 4A 级社会团体，单位会员与个人会员共 214 名。

开展妇幼保健机构中医药全覆盖项目 - 中医妇幼保健实用技术继续教育培训和北京市妇幼健康领域中医药“升降浮沉”工程 - 中医妇幼服务包培训班，全市妇幼保健院、助产机构、社区卫生服务中心等医疗机构妇幼相关人员通过线上及线下形式参加培训累计达到 3000 余人次。

协会在首都机场建设了“人文机场 健康中国”传统文化展示中心，成为首个进入国际交通枢纽的中医药文化展示项目，通过科普视频、科普互动设备、产品展示、文化体验活动等形式，为旅客提供视、听、触等多维度的中医药文化体验方式。协会根据传统经典名方和经验方联合开发载药量高、使用方便、易于携带的药浴气泡弹。该产品配以多种植物提取的植物香氛，是中医药健康创新型产品。

中华传统文化体验中心
Chinese Traditional Culture Experience Center

Beijing Healthcare Association of Traditional Chinese Medicine, founded in 2014, is a non-profit social organization established by the voluntary organization of enterprises engaged in Chinese medicine and health care, scientific research and development organizations and experts in Chinese medicine and health care industry and registered licensed Chinese medicine practitioners in Beijing. The Association has been rated as a 4A social organization, with 214 organization members and individual members.

It provides full coverage of traditional Chinese medicine in maternal and child health care institutions - continuing education and training on practical techniques for traditional Chinese medicine maternal and child health care, and the “ascending and descending” project of traditional Chinese medicine in the field of maternal and child health in Beijing - training course on Chinese medicine maternity and child care service kits. A total of more than 3,000 trainings have been attended by personnel related to women and children in the city's maternal and child healthcare hospitals, midwifery institutions, community health service centers and other medical institutions, both online and offline.

The Association has built a traditional culture exhibition center of "Humanistic Airport and Healthy China" at the Capital Airport, which is the first TCM culture exhibition project to enter the international transportation hub. It provides travelers with a multi-dimensional way of experiencing Chinese medicine culture through popular science videos, popular science interactive equipment, product displays, cultural experience activities and other forms of sight, sound and touch. The Association has jointly developed medicinal bath bubble bombs with high drug loading capacity, easy to use and easy to carry, based on traditional classic and empirical formulas. The product is formulated with a variety of plant-derived botanical fragrances as an innovative product for Chinese medicine health.

北京市中西医结合国际会诊中心
Beijing International Consultation Center of Integrated Traditional Chinese and Western Medicine

北京市中西医结合国际会诊中心由北京市中医药管理局批复成立，为中医药国际服务试点基地、在京外籍中医师会诊服务基地。汇集融合国内外中西医多学科专家资源，由国内外院士、国医大师、首都名中医及北京公立三甲医院、国际医疗机构等知名专家组成的中西医结合专家队伍，建立远程会诊服务平台建设，开展中西医结合多学科国际会诊、健康管理及中医药文化国际传播，构建中西医结合协同医疗服务网络，形成国际化医疗服务包，惠及国际企业驻华代表和境外人士。

会诊中心依托中医药名医故里文化传播与国际产业联合体项目，开展中医药国际学术活动，提升中医医疗服务、教育及培训效果，以临床创新成果转化促进健康产业发展。

外国记者团沉浸式中医药（传统医药）文化体验
Immersive TCM (Traditional Medicine) Cultural Experience for a Foreign Journalists' Delegation

The Beijing International Consultation Center of Integrated Traditional Chinese and Western Medicine was established with the approval of the Beijing Administration of Traditional Chinese Medicine. It serves as a pilot base for international TCM services and a consultation service base for foreign TCM practitioners in Beijing. The center brings together multidisciplinary expert resources in traditional Chinese and Western medicine from China and abroad. Its team of experts in integrated traditional Chinese and Western medicine includes academicians from China and abroad, National TCM Masters, renowned TCM physicians in Beijing, and renowned experts from Beijing public Grade A tertiary hospitals and international medical institutions. The center has established a remote consultation service platform and provides international multidisciplinary consultations integrating traditional Chinese and Western medicine, health management, and international dissemination of TCM culture. It is building a collaborative medical service network integrating traditional Chinese and Western medicine and developing international medical service packages to benefit representatives of international enterprises in China and individuals from overseas.

Relying on the Hometowns of Renowned TCM Physicians Cultural Promotion and International Industrial Alliance Project, the Consultation Center conducts international academic activities in TCM, improves the effectiveness of TCM medical services, education, and training, and promotes the development of the health industry through the transformation of clinical innovation achievements.

中国中医科学院西苑医院
让经期不再痛苦——女性幸福生活之旅
Xiyuan Hospital of China Academy of Chinese Medical Sciences
A Journey to Pain-Free Periods and Better Well-Being for Women

依托中国中医科学院西苑医院，为痛经女性提供为期 14 天的中医特色诊疗与康复之旅。服务涵盖专家一对一辨证论治、中药内服、膏方调理及艾灸、针刺、敷脐、耳穴压豆等中医外治法，配合健身气功教学与古都文化游览。我院妇科历史悠久，年诊治痛经患者 8500 余人次，中医治疗率 100%，总有效率达 95%，院内制剂复方归芍颗粒疗效显著。诊疗优势在于辨证施治、标本兼治，非经期治本、经期治标，毒副作用小、可长期用药，并提供 6 个月网络随访。全程改善症状、愉悦身心，是康复体质的优选之旅。

Based at Xiyuan Hospital of China Academy of Chinese Medical Sciences, this 14-day program provides women experiencing dysmenorrhea with a comprehensive TCM-based treatment and rehabilitation experience. The program includes one-on-one consultations and individualized treatment based on TCM pattern differentiation, oral Chinese herbal medicine, herbal paste therapy, and external TCM therapies such as moxibustion, acupuncture, umbilical application, and auricular acupressure with seed pressing. It also includes health-oriented Qigong instruction and cultural tours of Beijing, an ancient capital. The hospital's Department of Gynecology has a long history of providing specialized care. It treats more than 8,500 patients with dysmenorrhea annually, with a 100% rate of TCM treatment and an overall effectiveness rate of 95%. The hospital's in-house preparation, Compound Guishao Granules, has demonstrated notable therapeutic effects. The program features individualized treatment based on TCM pattern differentiation, addressing both the underlying condition and its symptoms. Treatment focuses on addressing the underlying condition during non-menstrual periods and managing symptoms during menstruation. It is characterized by relatively low toxic and adverse effects and can support long-term medication use, with six months of online follow-up provided. The program is designed to support symptom improvement and promote physical and emotional well-being throughout the journey, offering a comprehensive approach to restoring and maintaining overall health.

护心活血之旅——中医活血化瘀冠心病康复十日体验
Xiyuan Hospital of China Academy of Chinese Medical Sciences
A Heart-Care and Blood-Activating Journey — 10-Day TCM Rehabilitation Experience for Coronary Heart Disease

依托中国中医科学院西苑医院心血管病中心，为冠心病患者提供为期 10 天的中医康复之旅。服务涵盖主任医师一对一个体化诊治，开具汤药、膏方、食疗处方，配合子午流注、穴位贴敷、耳穴压豆等特色治疗，辅以八段锦、太极等传统功法及文化游览。我院活血化瘀研究成果曾获 2003 年度国家科技进步一等奖，活血化瘀防治冠心病特色鲜明，与现代医学优势互补。诊疗优势在于辨证论治、针药结合，以量表客观评估疗效，治疗结束可携自制膏方回国服用，并定期一对一随访。全程改善症状、提高生活质量，是心脏康复的优选之旅。

Based at the Cardiovascular Disease Center of Xiyuan Hospital of China Academy of Chinese Medical Sciences, this 10-day program provides patients with coronary heart disease with a TCM-based rehabilitation experience. The program includes one-on-one individualized diagnosis and treatment by a senior physician, with prescriptions for decoctions, herbal pastes, and therapeutic diets, complemented by distinctive TCM therapies such as Ziwu Liuzhu therapy, acupoint application, and auricular acupressure with seed pressing. Traditional exercises such as Baduanjin and Tai Chi, together with cultural tours, are also included. The hospital's research on activating blood circulation and removing blood stasis received the First Prize of the 2003 National Science and Technology Progress Awards. Its distinctive approach to the prevention and treatment of coronary heart disease through activating blood circulation and removing blood stasis complements the strengths of modern medicine. The program features individualized treatment based on TCM pattern differentiation and the combined use of acupuncture and herbal medicine, with standardized scales used for objective assessment of treatment outcomes. Upon completion of treatment, participants may take the hospital's self-prepared herbal paste home for continued use, with regular one-on-one follow-up provided. The program is designed to support symptom improvement and enhance quality of life throughout the journey, providing a comprehensive TCM approach to cardiac rehabilitation.

中国中医科学院西苑医院
针颜焕肤之旅——纳米梅花针抗皱淡斑三周体验

Xiyuan Hospital of China Academy of Chinese Medical Sciences
A Facial Rejuvenation Journey with Acupuncture — 3-Week Experience with Nano Plum Blossom Needle Therapy for Wrinkle Reduction and Pigmentation Fading

依托中国中医科学院西苑医院，为国际爱美人士提供为期三周的中医养颜淡斑之旅。服务涵盖精准体质辨识、纳米梅花针抗皱淡斑、天然中药内服及有机药膳调养。纳米梅花针直径仅为发丝的千分之一，可打开皮肤通道导入玻尿酸与传明酸，20 分钟即可去除面部干纹，一至两周色斑开始淡化。诊疗优势在于针药结合、内调外养，基于体质辨识个体化施治，配合经络调养与导引养生功，实现标本兼治。全程无创安全、远期疗效好，是感受中医美容智慧的优选之旅。

Based at Xiyuan Hospital of China Academy of Chinese Medical Sciences, this three-week program offers international beauty and wellness seekers a TCM-based journey for facial rejuvenation and pigmentation reduction. The program includes precise TCM constitution assessment, Nano Plum Blossom Needle Therapy for wrinkle reduction and pigmentation fading, oral natural Chinese herbal medicine, and personalized dietary conditioning with organic medicinal cuisine. The Nano Plum Blossom Needle has a diameter of only one-thousandth that of a human hair. It is used to open pathways in the skin for the delivery of hyaluronic acid and tranexamic acid. Facial fine lines caused by dryness can be removed within 20 minutes, while pigmentation begins to fade within one to two weeks. The program combines acupuncture and herbal medicine with internal conditioning and external care. Treatment is individualized based on TCM constitution assessment and complemented by meridian-based conditioning and Daoyin health exercises, with the aim of addressing both symptoms and underlying factors. The program is non-invasive and designed with safety and long-term results in mind, offering an opportunity to experience the traditional Chinese medicine approach to beauty and wellness.

中国中医科学院广安门医院
儿童鼻部疾患中医序贯疗法

Guang'anmen Hospital, China Academy of Chinese Medical Sciences
TCM Sequential Therapy for Pediatric Nasal Disorders

面向儿童过敏性鼻炎、腺样体肥大、扁桃体肥大及继发睡眠呼吸障碍等疾患。由中国中医科学院广安门医院孙书臣教授所创立的中医鼻病序贯疗法，依托院内特色制剂，对症状、体征分析和辨证的基础上，个体化配方，特殊加工制作，采用内外治法结合并贯穿始终的治疗方法，将中草药中挥发油的有效成分充分利用，进行熏鼻、滴鼻、口服中药，搭配穴位贴敷、皮内针外治。临床数据显示 92.6% 患儿可免于手术，接受度高，绿色非手术方案。

This program is designed for children with allergic rhinitis, adenoid hypertrophy, tonsillar hypertrophy, and secondary sleep-related breathing disorders. The TCM sequential therapy for nasal disorders, developed by Professor Sun Shuchen of Guang'anmen Hospital, China Academy of Chinese Medical Sciences, is based on the hospital's distinctive in-house preparations. Following an analysis of symptoms and clinical signs and TCM pattern differentiation, individualized formulas are prepared using specialized processing techniques. The treatment integrates internal and external therapies throughout the course, making full use of the active volatile oil components in Chinese herbal medicines through nasal fumigation, nasal drops, and oral Chinese herbal medicine, supplemented by external therapies such as acupoint application and intradermal acupuncture. Clinical data show that 92.6% of children may avoid surgery. With high patient acceptance, the program provides a non-surgical treatment approach based on TCM.

中国中医科学院广安门医院
失眠中医综合治疗
Guang'anmen Hospital, China Academy of Chinese Medical Sciences
Comprehensive TCM Treatment for Insomnia

睡眠失衡根源为脏腑失调、阴阳失交，本服务包适用于 18-65 岁存在入睡困难、多梦早醒，伴随日间疲劳、情绪波动人群，排除急性期重性精神疾病、未控制严重躯体疾病。建立“评估 - 干预 - 监测 - 再调整”闭环调理模式。采用相关睡眠量表，结合中医目诊、四诊合参辨证分型。运用院内特色制剂，搭配耳穴压丸、艾灸、刮痧等外治，辅以艺术疗愈、传统功法，改善睡眠同时调节情绪，降低药物依赖。提供国际化全流程服务，支持商业保险结算。

Sleep disturbances are considered in TCM to be associated with imbalances in the internal organs and disharmony between Yin and Yang. This service package is intended for individuals aged 18–65 who experience difficulty falling asleep, vivid or frequent dreaming, or early awakening, accompanied by daytime fatigue or mood fluctuations. It excludes individuals with acute severe mental disorders or uncontrolled serious physical conditions. The program establishes a closed-loop management model of “assessment–intervention–monitoring–readjustment”. Relevant sleep assessment scales are used in combination with TCM eye diagnosis and comprehensive assessment based on the four diagnostic methods to determine individual TCM patterns. The program uses distinctive in-house preparations together with external TCM therapies such as auricular acupressure with ear seeds, moxibustion, and Gua Sha, supplemented by art-based therapy and traditional health exercises. The approach aims to improve sleep while supporting emotional regulation and reducing reliance on medication. Comprehensive services are provided throughout the entire process for international patients, with support for settlement through commercial health insurance.

中国中医科学院广安门医院
纤维肌痛症的中医综合治疗

Guang'anmen Hospital, China Academy of Chinese Medical Sciences
Comprehensive TCM Treatment for Fibromyalgia

依托广安门医院国家临床重点专科风湿免疫科，组建风湿、心身医学、疼痛 MDT 多学科团队。针对纤维肌痛周身疼痛、乏力、睡眠障碍及情绪异常，采用 VAS、FIQR、PSQI 等量表量化评估，结合中西医鉴别排查与中医四诊辨证，立足通络止痛、益气养血治则，运用院内科研验方柔筋方等特色中药制剂，联合针灸、拔罐、经络外治技术及路氏八段锦功法，缓解躯体疼痛，改善睡眠与躯体机能，打造诊疗 - 康复 - 文化体验”一体化涉外康养服务。

Relying on the Department of Rheumatology and Immunology, a National Clinical Key Specialty of Guang'anmen Hospital, a multidisciplinary team comprising specialists in rheumatology, psychosomatic medicine, and pain management has been established. For the widespread pain, fatigue, sleep disturbances, and emotional symptoms associated with fibromyalgia, quantitative assessments are conducted using the Visual Analog Scale (VAS), Fibromyalgia Impact Questionnaire-Revised (FIQR), Pittsburgh Sleep Quality Index (PSQI), and other relevant scales, combined with differential evaluation based on both TCM and Western medicine and TCM pattern differentiation through the four diagnostic methods. Guided by the therapeutic principles of unblocking the meridians and relieving pain, as well as supplementing Qi and nourishing blood, the program employs distinctive Chinese herbal preparations, including Roujin Formula, an in-house research-based formula. These preparations are combined with acupuncture, cupping therapy, meridian-based external therapies, and Lu-style Baduanjin exercises. The integrated approach is designed to alleviate physical pain and improve sleep and physical function. It provides an integrated international healthcare and wellness service combining diagnosis and treatment, rehabilitation, and cultural experiences.

08 中国中医科学院广安门医院 小儿推拿与中医药结合治疗小儿常见病

Guang'anmen Hospital, China Academy of Chinese Medical Sciences Integrated Pediatric Tuina and TCM Treatment for Common Pediatric Conditions

小儿推拿是中医几千年以来独特的一种治疗方法。因小儿服药困难，故医生用手法作用于小儿特定穴位上进行治疗。主要针对 0-6 岁婴幼儿，因先天脾胃虚弱或喂养不当出现食欲缺乏，消化不良，消瘦或肥胖，便秘或腹泻等；呼吸系统疾病，如外感咳嗽、发热、支气管炎、哮喘等；遗尿、夜啼等；运动发育迟缓，肌性斜颈，足内翻等各种杂病。以中医理论为指导，根据小儿的生理病理特点，应用手法于穴位作用于小儿的机体，以调整脏腑、经络气血功能，从而达到防病治病，改善免疫功能的目的。

Pediatric Tuina is a distinctive therapeutic method that has been practiced in Traditional Chinese Medicine (TCM) for thousands of years. As children may have difficulty taking medication, practitioners use specific manual techniques on designated acupoints to provide treatment. The program primarily serves infants and young children aged 0–6 who experience loss of appetite, indigestion, underweight or obesity, constipation, diarrhea, and other conditions associated with congenital weakness of the spleen and stomach or improper feeding. It also addresses respiratory conditions, such as cough caused by external pathogens, fever, bronchitis, and asthma. Other conditions include bedwetting and nighttime crying. The program also covers various other conditions, including delayed motor development, muscular torticollis, and clubfoot. Guided by TCM theory and based on the physiological and pathological characteristics of children, manual techniques are applied to specific acupoints to regulate the functions of the internal organs, meridians, and Qi and blood, with the aim of preventing and treating disease and improving immune function.

09

中国中医科学院广安门医院
心脏衰老的中西医结合评估及干预

Guang'anmen Hospital, China Academy of Chinese Medical Sciences
Integrated TCM and Western Medicine Assessment and Intervention for Cardiac Aging

项目以《黄帝内经》脏腑气血盛衰理论为指导，心为君主之官，心脏衰老是人体整体衰老的核心标志。适用希望延缓心脏衰老、存在心肺亚健康或早期心功能减退，无重大疾病人群。构建“评估 - 干预 - 再评估”闭环抗衰模式。联合心肺功能检测、握力检测、目诊仪、中医体质辨识、四诊合参开展量化评估。定制中药汤剂、膏方，搭配皮内针、穴位贴敷等外治及传统功法，延缓心脏衰老、改善心肺功能。国际化全流程服务，支持商业保险结算。

Guided by the theory of the waxing and waning of the functions of the zang-fu organs and Qi and blood in Huangdi Neijing (The Yellow Emperor's Inner Classic), which describes the heart as the “Monarch Official,” this service package regards cardiac aging as a core indicator of overall aging. The program is intended for individuals who wish to slow cardiac aging and who have suboptimal cardiopulmonary health or early decline in cardiac function, without major underlying diseases. A closed-loop anti-aging model of “assessment–intervention–reassessment” is established. Quantitative assessment is conducted through a combination of cardiopulmonary function testing, grip strength testing, TCM eye diagnosis using an eye diagnostic device, TCM constitution assessment, and comprehensive assessment based on the four diagnostic methods. Customized Chinese herbal decoctions and herbal pastes are prescribed, together with external therapies such as intradermal acupuncture and acupoint application, as well as traditional health exercises, with the aim of slowing cardiac aging and improving cardiopulmonary function. Comprehensive international services are provided throughout the entire process, with support for settlement through commercial health insurance.

10 中国中医科学院广安门医院 中医药特色疗法逆转脂肪肝

Guang'anmen Hospital, China Academy of Chinese Medical Sciences Reversing Fatty Liver Disease with TCM-Based Therapies

非酒精性脂肪肝属中医“肝癖”范畴，多由膏浊内蕴、脾失健运、痰瘀阻滞肝络所致，常伴随血脂异常、乏力、肝区胀闷，可逐步进展为脂肪性肝炎、肝纤维化。依托广安门医院肝病重点专科，整合肝病、内分泌、营养多学科 MDT 团队，发挥名老中医临床经验，面向国内外代谢相关脂肪性肝病患者打造纯中医为主的医疗旅游康养方案。开展体质辨识与脏腑辨证，定制个性化中药调理，配合穴位靶向干预、中医膳食与运动指导，调节脂质代谢，助力轻中度脂肪肝逆转。

In TCM, non-alcoholic fatty liver disease (NAFLD) is classified under the category of “Gan Pi” (liver accumulation) and is commonly associated with the internal accumulation of phlegm and turbidity, impaired transportation and transformation by the spleen, and obstruction of the liver meridians by phlegm and blood stasis. It is often accompanied by dyslipidemia, fatigue, and a feeling of distension or discomfort in the liver region, and may progressively develop into steatohepatitis and liver fibrosis. Relying on Guang'anmen Hospital's key specialty in hepatology, the program brings together a multidisciplinary team in hepatology, endocrinology, and nutrition. Drawing on the clinical experience of renowned senior TCM practitioners, it provides a medical tourism and wellness program centered primarily on TCM for patients with metabolic dysfunction-associated steatotic liver disease (MASLD) from China and abroad. TCM constitution assessment and zang-fu pattern differentiation are conducted to develop personalized Chinese herbal medicine regimens, complemented by targeted acupoint interventions, TCM dietary guidance, and exercise guidance to regulate lipid metabolism and support the reversal of mild to moderate fatty liver disease.

中国中医科学院广安门医院
肿瘤患者中医治疗与康复

Guang'anmen Hospital, China Academy of Chinese Medical Sciences
TCM Treatment and Rehabilitation for Cancer Patients

依托广安门医院国家重点专科肿瘤科，传承“固本清源”学术思想，践行“五治五养”全程康复模式。面向 18-75 岁肿瘤术后、放化疗后、病情稳定带瘤生存患者（Karnofsky 评分≥ 90）。开展体能、心理、营养及中医四诊多维评估，以扶正祛邪为治则，运用院内制剂、膏方、针灸外治，配合艺术心理干预、传统功法，减轻放化疗毒副反应，调节机体免疫，防控复发转移。提供多语种陪诊、签证材料、离境后 3 个月线上随访，支持商业保险结算。

Relying on the Department of Oncology, a National Key Specialty of Guang'anmen Hospital, the program carries forward the academic philosophy of “strengthening the root and clearing the source” and implements a comprehensive rehabilitation model based on the principles of “five treatments and five forms of nourishment”. The program is designed for patients aged 18–75 who have undergone cancer surgery, radiotherapy, or chemotherapy, as well as patients living with cancer whose condition is stable, with a Karnofsky Performance Status (KPS) score of ⩾ 90. A multidimensional assessment of physical function, psychological status, nutrition, and TCM findings based on the four diagnostic methods is conducted. Guided by the therapeutic principle of supporting healthy Qi and eliminating pathogenic factors, the program uses in-house TCM preparations, herbal pastes, acupuncture, and other TCM external therapies, complemented by art-based psychological interventions and traditional health exercises, to alleviate the toxic and adverse effects of radiotherapy and chemotherapy, regulate immune function, and help prevent and control recurrence and metastasis. Multilingual medical accompaniment, visa documentation support, and online follow-up for three months after departure are provided, with support for settlement through commercial health insurance.

15 首都医科大学附属北京中医医院 偏头痛针灸治疗

Beijing Hospital of Traditional Chinese Medicine, Affiliated with Capital Medical University Acupuncture Treatment for Migraine

由北京中医医院针灸诊疗中心提供。近年来该中心主导的多个临床试验已明确针刺对不同偏头痛类型的有效性，发现针刺可降低发作频率与疼痛强度，同时配套院内特色中药制剂，针药协同增效。治疗上采用以“贺氏三通法”及“宣阳解郁”为理论指导的个体化针刺方案，覆盖不同类型偏头痛的急性止痛与间歇期预防治疗。本服务面向国际患者提供多语种诊疗支持，全程诊疗随访，适合海外患者来京接受规范中医针灸医疗旅游服务。

This service package is provided by the Acupuncture Diagnosis and Treatment Center of Beijing Hospital of Traditional Chinese Medicine. In recent years, multiple clinical trials led by the Center have demonstrated the efficacy of acupuncture for different types of migraine, showing that acupuncture can reduce attack frequency and pain intensity. The treatment is complemented by distinctive in-house Chinese herbal preparations, with acupuncture and herbal medicine used in combination to enhance the therapeutic effect. Treatment involves individualized acupuncture protocols guided by the theories of the “He's Three-Passage Method” and “Xuan Yang Jie Yu” (dispersing Yang and relieving constraint), covering acute pain relief and preventive treatment during the interictal period for different types of migraine. The service provides multilingual medical support and follow-up throughout the treatment process for international patients, making it suitable for overseas patients seeking standardized TCM acupuncture care in Beijing as part of a medical tourism experience.

16 首都医科大学附属北京中医医院 糖尿病足中医药综合疗法

Beijing Hospital of Traditional Chinese Medicine, Affiliated with Capital Medical University Comprehensive TCM Treatment for Diabetic Foot

首都医科大学附属北京中医医院糖尿病足中医特色疗法服务包，依托疮疡外科专病门诊，以中药全程干预为核心，结合中药溻渍、蚕食清创及负压吸引等中西医手段，形成集清创、通络、抗感染、康复指导于一体的综合体系，可加速创面愈合，有效降低截肢率与致残率。科室传承赵炳南等名医经验，拥有回阳生肌纱条、朱红膏、舒脉胶囊等四十余种特色制剂，辨证施治优势显著。服务包已对接北京市个人综合医疗保险，涵盖中医特色治疗服务包，实现医保以外再保险，保障更充分。

The Diabetic Foot TCM Specialized Treatment Service Package of Beijing Hospital of Traditional Chinese Medicine, Affiliated with Capital Medical University, is provided through the Specialized Clinic for Surgical Treatment of Sores and Ulcers. Centered on comprehensive intervention with Chinese herbal medicine throughout the treatment process, it integrates TCM and Western medical approaches, including Chinese herbal soaking therapy, serial debridement, and negative pressure wound therapy, to establish an integrated system encompassing debridement, promotion of meridian circulation, infection control, and rehabilitation guidance. The approach can accelerate wound healing and effectively reduce amputation and disability rates. The department carries forward the clinical experience of renowned physicians such as Zhao Bingnan and has more than 40 distinctive in-house preparations, including Huiyang Shengji Gauze, Zhuhong Ointment, and Shumai Capsules, with notable strengths in treatment based on TCM pattern differentiation. The service package is connected with Beijing's comprehensive personal medical insurance and covers specialized TCM treatment services, providing supplementary insurance coverage beyond basic medical insurance for more comprehensive protection.

首都医科大学附属北京中医医院
中医治疗银屑病

Beijing Hospital of Traditional Chinese Medicine, Affiliated with Capital Medical University
TCM Treatment for Psoriasis

首都医科大学附属北京中医医院皮肤科“中医治疗银屑病”服务包，依托银屑病专病门诊，针对银屑病，特别是久治不愈、反复发作的斑块状银屑病和红皮病型银屑病，以中医药全程干预为特色，且拥有 10 余种特色院内制剂包括丸药、外用药膏、洗剂等，依据中医辨证论治原则，采用辨证内服中药、中药洗浴、中药湿敷、中药软膏外用、针刺放血治疗、火针治疗、火罐治疗、艾灸治疗等中医特色疗法治疗银屑病，使红斑变淡、变薄、鳞屑减少、面积缩小，或消退。瘙痒减轻或消失。延缓复发，延长缓解期。

The Department of Dermatology of Beijing Hospital of Traditional Chinese Medicine, Affiliated with Capital Medical University, offers a “TCM Treatment for Psoriasis” service package through its specialized psoriasis clinic. The program is designed for patients with psoriasis, particularly those with persistent or recurrent plaque psoriasis and erythrodermic psoriasis, and features comprehensive TCM intervention throughout the treatment process. The department has more than 10 distinctive in-house TCM preparations, including oral pills, topical ointments, and lotions. Based on the TCM principle of treatment according to pattern differentiation, the program employs a range of distinctive TCM therapies for psoriasis, including oral Chinese herbal medicine prescribed according to the individual's TCM pattern, Chinese herbal bathing, Chinese herbal wet compresses, topical Chinese herbal ointments, bloodletting therapy with acupuncture, fire acupuncture, fire cupping, and moxibustion. These treatments are intended to reduce the redness and thickness of plaques, decrease scaling, reduce the affected area, or promote lesion resolution. They are also intended to alleviate or eliminate itching. The program aims to delay recurrence and prolong periods of remission.

18 北京中西医结合医院
腰椎间盘突出症针推动静结合治疗
Beijing Hospital of Integrated Traditional Chinese and Western Medicine Integrated Acupuncture, Dynamic Manipulation, and Static Needling Therapy for Lumbar Disc Herniation

本项目以“针推动静结合”为核心，运用针刺、推拿正骨、中药膏摩等中医外治法，为腰椎间盘突出症患者提供非手术个体化治疗方案。该疗法以“椎间孔刺激法”为特色针法，结合动态推拿与静态针刺，临床疗效优于普通针刺，可有效促进突出椎间盘重吸收。针灸科为北京市中医药管理局“十四五”重点专科、国家中西医协同旗舰科室，承担国际医疗旅游服务包工作。正在推进国际商业保险对接结算业务及国际医疗友好服务体系标准探索。

Centered on the integrated approach of acupuncture, dynamic manipulation, and static needling, this program provides individualized non-surgical treatment for patients with lumbar disc herniation using TCM external therapies, including acupuncture, Tuina and bone-setting techniques, and Chinese herbal ointment massage. The therapy features the “intervertebral foramen stimulation technique” as its distinctive acupuncture method, combined with dynamic Tuina and static needling. Its clinical efficacy is superior to that of conventional acupuncture and can effectively promote the reabsorption of herniated intervertebral discs. The Department of Acupuncture and Moxibustion is designated as a key specialty under the 14th Five-Year Plan of the Beijing Municipal Administration of Traditional Chinese Medicine and as a national flagship department for the coordinated development of TCM and Western medicine. It is responsible for the provision of international medical tourism service packages. The department is currently advancing initiatives for direct settlement with international commercial insurance providers and exploring standards for an international-friendly medical service system.

19 北京中西医结合医院 培补脾肾法治疗不孕症

Beijing Hospital of Integrated Traditional Chinese and Western Medicine Treatment of Infertility Using Spleen- and Kidney-Supplementing Therapy

应用中医辨证，参照西医各项诊断，查明不孕病因，通过中药内服及外治，针对不孕不育症患者提供非手术治疗，以调整患者肝脾肾及任胞功能为中心，最终达到提高受孕几率及受精卵成活率的目的。该疗法以内服中药及中药保留灌肠为特色，是柴丽宏主任及其老师们创立，起到整体调治，里应外合，直通病所，疗效显著。本科为北京市中医药管理局“十四五”重点专科，正在推进国际商业保险对接结算业务及国际医疗友好服务体系标准探索。

This program applies TCM pattern differentiation, with reference to relevant Western medical diagnostic assessments, to identify the underlying causes of infertility. It provides non-surgical treatment for patients with infertility through oral Chinese herbal medicine and external TCM therapies, focusing on regulating the functions of the liver, spleen, and kidneys, as well as those of the Ren Meridian and uterus (collectively referred to as Ren-Bao in this context), with the aim of increasing the likelihood of conception and the survival rate of fertilized eggs. The therapy features oral Chinese herbal medicine and retention enemas with Chinese herbal medicine. Developed by Director Chai Lihong and her mentors, it adopts a holistic approach to treatment, combining internal and external therapies to directly target the affected areas, with notable therapeutic effects. The department is designated as a key specialty under the 14th Five-Year Plan of the Beijing Municipal Administration of Traditional Chinese Medicine. It is currently advancing initiatives for direct settlement with international commercial insurance providers and exploring standards for an international-friendly medical service system.

20 北京中西医结合医院 小儿脑瘫三步针法治疗

Beijing Hospital of Integrated Traditional Chinese and Western Medicine Three-Step Acupuncture Therapy for Pediatric Cerebral Palsy

以“三步针法”为核心，针对小儿脑瘫开展个体化针灸治疗。三步针法为针灸科于晓刚主任创立的特色针法，以头针为主，配合体针及康复训练，适用于小儿脑性瘫痪的运动及认知功能康复。科室为北京市中医药管理局“十四五”重点专科、国家中西医协同旗舰科室，在小儿脑瘫等神经系统疾病针灸治疗方面具有丰富经验。特色制剂包括中药膏摩、艾条灸等中医外治法配合治疗。正在推进国际商业保险对接结算业务及国际医疗友好服务体系标准探索。

This program centers on the Three-Step Acupuncture Method and provides individualized acupuncture treatment for pediatric cerebral palsy. The Three-Step Acupuncture Method is a distinctive acupuncture technique developed by Dr. Yu Xiaogang, Director of the Department of Acupuncture. It primarily uses scalp acupuncture, supplemented by body acupuncture and rehabilitation training, and is applicable to the rehabilitation of motor and cognitive functions in children with cerebral palsy. The department is a “14th Five-Year Plan” Key Specialty designated by the Beijing Municipal Administration of Traditional Chinese Medicine and a National Flagship Department for the Coordinated Integration of Traditional Chinese and Western Medicine. It has extensive experience in acupuncture treatment for neurological disorders, including pediatric cerebral palsy. Distinctive external TCM therapies, including Chinese herbal paste massage and moxa-stick moxibustion, are used as complementary treatments. The hospital is advancing direct settlement arrangements with international commercial health insurance providers and exploring standards for an international-friendly medical service system.

北京市鼓楼中医医院
股骨头坏死中医治疗

Beijing Gulou Hospital of Traditional Chinese Medicine
TCM Treatment for Femoral Head Necrosis

本服务依托北京市东城区非物质文化遗产项目马氏中医骨科技术，面向海内外患者提供股骨头坏死一体化医疗旅游服务。配套多学科专家面诊、影像评估、中医体质辨识、全程翻译及就医保障服务。诊疗以非遗正骨、砭石外治、针药并用等为特色，坚持中医保髋保守治疗，辨证个体化施治，力求延缓病情进展，降低关节置换风险。配备院内特色中药制剂、外用膏剂，内服外敷协同，改善髋部血运，减轻疼痛、恢复关节功能。可对接国际商业保险，协助整理理赔资料。建立出院后远程随访与康复指导，兼顾诊疗实效与就医体验，为国际患者提供优质的中医保髋诊疗选择。

This service is based on the Ma's TCM Orthopedic Technique, an intangible cultural heritage project of Dongcheng District, Beijing, and provides integrated medical tourism services for patients with femoral head necrosis from China and abroad. The service package includes in-person consultations with multidisciplinary specialists, imaging assessment, TCM constitution assessment, interpretation throughout the medical process, and medical care support services. The treatment features intangible cultural heritage bone-setting techniques, Bian-stone external therapy, and the combined use of acupuncture and Chinese herbal medicine. It adopts a conservative TCM approach aimed at preserving the hip joint, with individualized treatment based on TCM pattern differentiation, with the goal of slowing disease progression and reducing the risk of joint replacement. The program includes distinctive in-house Chinese herbal preparations and topical herbal ointments. Oral and external therapies are used in combination to improve blood circulation in the hip, relieve pain, and restore joint function. The service can facilitate coordination with international commercial health insurance providers and assist with the preparation of insurance claim documents. Remote follow-up and rehabilitation guidance are provided after discharge, combining treatment outcomes with the patient experience and offering international patients a TCM treatment option focused on hip preservation.

22 北京大诚中医针灸医院
慢性疼痛的程氏针灸治疗与失眠的程氏针灸治疗
Beijing Dacheng Hospital of Traditional Chinese Medicine and Acupuncture
Cheng's Acupuncture Treatment for Chronic Pain and Insomnia

国家非遗程氏针灸以“形气神”同调为理念，综合 3D 体态检测、经络触诊、耳穴探查、体质辨识，梳理体态偏颇（形）、内脏功能失衡（气）、情绪调节失调（神），厘清疾病根源。

医院作为程氏针灸临床基地，采用针刺、艾灸、推拿、导引、耳穴、中药等传统方式，结合体感音乐、中药泡浴、头部水疗、射频超短波、旋磁等现代化体验，针对骨关节肌肉疼痛、内脏疼痛、失眠等，提供全场景下的中医综合治疗。

并按体质提供个性化中药香珠制作、健康茶饮等。

As a national-level intangible cultural heritage technique, Cheng's Acupuncture is guided by the principle of regulating “form, Qi, and spirit” (Xing, Qi, and Shen) in an integrated manner. It combines 3D postural assessment, meridian palpation, auricular point examination, and TCM constitution assessment to identify postural imbalances (“form”), visceral functional imbalances (“Qi”), and emotional dysregulation (“spirit”), thereby clarifying the underlying factors associated with the condition. As a clinical base for Cheng's Acupuncture, the hospital combines traditional TCM approaches, including acupuncture, moxibustion, Tuina, Daoyin exercises, auricular therapy, and Chinese herbal medicine, with modern wellness modalities such as vibroacoustic music, Chinese herbal baths, head hydrotherapy, radiofrequency short-wave therapy, and rotating magnetic therapy. These approaches are used to provide comprehensive TCM treatment across a range of settings and modalities for conditions including musculoskeletal pain, visceral pain, and insomnia. Personalized Chinese herbal aroma beads and health-promoting teas are also provided based on individual TCM constitution.

23 北京皇城股骨头坏死专科医院
股骨头坏死中医专科治疗与膝关节骨性关节炎中医药治疗
Beijing Huangcheng Specialized Hospital for Femoral Head Necrosis Specialized TCM Treatment for Femoral Head Necrosis and TCM Treatment for Knee Osteoarthritis

我院开展股骨头坏死、膝关节骨性关节炎中医药专科诊疗康复服务，依托中医理论辨证施治，采用中药内服、外治、手法理疗、穴位调理等综合方案，激发骨组织自身修复能力，疏通气血，改善关节生理功能，有望免去关节置换手术痛苦。治疗以三个月为一疗程，经住院治疗，病情稳定后，患者可遵医嘱带药居家继续治疗。医院配备英、俄语翻译，设有涉外厨房，提供远程问诊，方便海外患者就医，我院目前共接诊国内外患者 6 万余人次，大量临床病例证实疗效确切。

Our hospital provides specialized TCM diagnosis, treatment, and rehabilitation services for femoral head necrosis and knee osteoarthritis. Based on TCM theories and treatment according to pattern differentiation, the program combines oral Chinese herbal medicine, external therapies, manual therapy, and acupoint-based treatment to support the body's own bone tissue repair processes, promote the circulation of Qi and blood, and improve joint function, with the potential to help patients avoid the burden of joint replacement surgery. The treatment is provided in three-month courses. Following inpatient treatment, patients may continue treatment at home with prescribed medication once their condition has stabilized, as directed by their physician. The hospital provides English- and Russian-language interpretation, has a kitchen serving international patients, and offers remote consultations to facilitate access to medical services for overseas patients. To date, the hospital has treated more than 60,000 patient visits from China and abroad, and a large number of clinical cases have demonstrated favorable treatment outcomes.
